- 5. Information Technology**
- 6. Mechanical Engineering**
- 7. Artificial Intelligence and Data Science**

Student Induction Program

A two week Student Induction Program was organized for the I Year students of Meenakshi Sundararajan Engineering College From 15th November, 2021 This program is majorly aimed to acclimatize the I year Engineering Students to the new environment and create a bonding between the Teacher and Student, making them feel at ease. The Induction Program was inaugurated at 9:00 AM on 15-11-2021 in KRS Centenary Seminar Hall with a warm welcome to the I year students. The Secretary, Director, Principal, Deans & HoDs briefed them on the importance of Induction Program and advised them to embrace the value & essence of carrying technical perception in solving day-to-day problems of society and nation. The activities under Induction program was carefully planned such that the new students are provided with basic information and prerequisites needed for engineering course and their chosen domain specialization. Understanding of society, ethics and human relationships were part of value added programs intending to build the character with essential qualities, to become a fulfilling engineer, a good citizen and a peaceful human being.

Module 9 : Extra-curricular Activities

An extracurricular activity or cultural activities is an activity, performed by students, that falls outside the normal curriculum of college or university education. Such activities are generally voluntary, social, philanthropic, and often involve others of the same age. However, sometimes the college principals and HODs also bring in these activities among the students to bring out the hidden talents from students.

- Placement training programme gives good exposure to technical skills, career guidance, character development, communication skills for the students.
- Japanese training is a opportunity for a person to learn a new language and culture. It will add wonders to ones resume and can be recruited easily.
- Societal Beneficial Innovation is a programme in which students create innovative and simple projects which are useful for the public and hand it over directly to the public (beneficial).
- Celebration of national day and festival day brings out the talent of the students.
- Industrial Visits is a great collaboration between the industries and the students where students can learn new experiences and improve their knowledge.

Outcome of this SIP 2021

- To sensitise the student about the scope of life – individual, family (inter-personal relationship), society and nature/existence.
- Take care of health by physical activity, meditation and yoga.
- All 8 departments have familiarised with their department with faculty, alumni, senior student and achievements
- Organizations serving civilization or doing some charitable work may also be visited or collaborated with to get students to understand their working principles and serve mankind.
- They can know more about many fields and learn more about what interests them on an individual level and make progress in that field.

Outcome of this SIP 2021

- Provide an interactive environment and help them build up confidence. Discuss their relevance, get a glimpse of our traditional values and culture.
- To develop the clarity of humanistic culture and its expression through literature, students exposed to local, regional, national, or international literature. It will help them in understanding traditional and contemporary values and thoughts.
- To create a lively environment, increase the interactions, develop a new skill, and help them appreciate the beauty of non-academic aspects.
- To develop a sense of aesthetics and also enhance creativity which would, hopefully, grow into engineering design later.
