(Managed by I.I.E.T Society)

363, Arcot Road , kodambakkam, Chennai -24

## CIRCULAR

Students are informed to gather at seminar hall on 16/06/2019 by 10:30 am. for the lecture given by Vignesh babu from LUPITER Technology on the topic 'Introduction to Building Information Modeling'.. Students can utilize this opportunity to get knowledge and information. Students are requested to be punctual and to maintain silence during the lecture.

## BUILDING INFORMATION MODELING

16/06/2019

Vignesh balu

(lupiter technologies)

BIM-building information modeling is a process that begins with the creation of a intelligent 3D model and enable document management, coordination and simulation during the entire lifecycle of a project. It is used to create design and document of a building. There are 7phases in finishing a building namely: architect, designer consultant. Civil engineering , plumbing, mechanical, electrical, contractor. In modeling the given structure BIM is used in todays technology. It is used for the analysis to explored design option. Autodesk Revit is the best BIM software used. The BIM which made mandatory in some of the country. Most of the country which adopt BIM to develop smart building. So BIM is the software and useful in designing in the future modeler.

GUEST LECTURE ON INTRODUCTION TO BUILDING INFORMATION MODELLING  
INFERENCE FROM FEEDBACK

The session was very useful to know more about the building information modeling .The students learnt about that software and it will be very useful for them in jobs as it has more scope in future . The guest lecture was highly interactive and it was a good platform to gain knowledge about BIM.

**Minutes of Achieve Excellence Program meeting**

Venue: CSE LAB 1

Date: 9.3.2019

- Oath read by the student president and recited by the members.
- Students who participated in various events conducted by other colleges were congratulated.
- All the student members were motivated for participating in various co-curricular events.
- Importance of improving the coding skills was discussed.
- Planned to implement simple concepts from journal papers.
- Advised to prepare well for the forth coming university examinations.

## SIRIUS WORKSHOP - CODE WITH NODE

A three day workshop 'Code with Node' was conducted at Meenakshi Sundararajan Engineering College by Student Technology Empowerment Program, a Sirius Campus Initiative from 4<sup>th</sup> Jan, 2019 to 6<sup>th</sup> Jan, 2019 for the students of Computer Science and Information Technology who were shortlisted based upon their answers on the respective workshop registration site.

The first day of the workshop started with an introduction to the bright career opportunities available at SIRIUSCOM for the talented freshers. Followed by that, the basic language for web creation, HTML, was taught with its important terminologies covered. Students learnt via hands on approach by designing web pages along with the teaching official. After a short break, a small activity which was both fun and whimsical that encouraged students to work as a team was carried on. After that the students were taught fundamental and extensive concepts of CSS for making the webpage look more creative and attractive. Students learned to create a basic web page using CSS and HTML on the first day of the workshop which ended with a question answer session. Students who were active, attentive and cooperative were provided with small gifts to encourage them to keep that up.

On the second day of workshop students were taught to make their webpage not only creative but also responsive. JavaScript, Json and JQuery were taught from scratch to few fundamental concepts. Hands on approach was followed by the students to get more comfortable in coding the stuffs themselves. Students were introduced into the concept of NodeJS briefly which is an open source platform that is predominantly used by major enterprises. Followed by the fun activities to revive the students' spirit and question answer session, the second day of workshop ended with students learning appreciable knowledge in front end languages.

The third day of workshop began with a commencement on unstructured data and structured data. Students were taken into the learning spree of mongodb which is a document oriented database program. Students worked together with the teaching official to construct the e-commerce webpage with respective front end, middle end and back end. After a small break and a real fun activity to prevent boredom, the session carried on with a preamble to the pioneering field Artificial Intelligence. Students were taught to build a small play bot along with its root algorithms. A hands on approach was followed in order to make students get familiar with realtime working conditions. After quite a long question answer session, the participation certificates were distributed to the students. The officials gave students remarkable tips to get into the field and cope up with the working environment.

The workshop proved to be extremely beneficial for students as they learnt about the technologies that current IT industry is working upon in hands on and interactive way. Blooming technology domains were explained in a simple and efficient. The teaching officials implemented new methods of teaching to keep students always focused and responded to every technical doubt that was asked. Overall, the workshop was a good experience for the students in getting to know their working field in a different perspective.

## GUEST LECTURE REPORT

A student interactive session on **Opportunities for higher studies** was arranged by the department of Computer Science and Engineering in association with CSI Students Chapter and Achieve Excellence Program on 7/3/2019. The session was handled by Byju's educational technology company. The session was about opportunities for higher studies in technical, managerial as well as techno-managerial areas. The importance of higher studies was conveyed to the students and that UG alone is not sufficient to fetch a good job. The expectations from an employee have increased all over the world.

The session aimed at making the students realize that a post-graduation abroad added weight to a resume and opened up opportunities in many international companies with higher salary. All the myths and reservations about higher studies abroad and its cost were cleared by the lecturers. The students were exposed to a variety of options on the same which was divided into three domains. Students interested in continuing in their technical area were prompted to take the AIGAC test to see their standards and use the scores to do their post-graduation. Those who wanted to switch to the managerial area were asked to look up on deferred MBA programs, which are shorter MBA programs requiring no work experience. They are equivalent to a normal one. Some of them which were suggested included Harvard's 2+2 program which is a four-year course and Yale's Silver Scholar program which is a three year course especially for fresh graduates. Students were also introduced to the Masters in Management program provided by Universities in Singapore and the US which is a one or a one and a half year program and is also economical. The Young Leader's Program offered by Indian school of Business, a one year deferred MBA program was also recommended. It provide a perspective on management education to the students transforming uncertainty into confidence. Students who were confused between technical and management area were introduced to techno-managerial programs. One of them was Master of Engineering Management which integrates technical skills with business management to solve difficult problems. Also, Masters in Management Information Systems which is more focused on information systems, technology and people was a good option provided.

Students were advised to take the Empower prodigy exam which is a scholarship exam for graduated students. Optional Practical Training Period which is a one year training period in your field of expertise was also suggested. Most of the post-graduation courses abroad required GRE scores and the students were advised to take the exam. Sample questions were given in the form of handouts and students were taught a few tricks and easy methods to find the right answer. They also advised the students to build their profile in terms of both co-curricular as well as extra-curricular activities and start doing internships in their field of expertise.

## GUEST LECTURE REPORT

A guest lecture on **Presenting and Publishing Papers** was organized by the department of CSE in association with CSI Students Chapter and Achieve Excellence Program, on 25th January, 2019. The speaker was Mr. Prasanna Karthik Vairam, Research Scholar in the RISE Lab of Department of Computer Science and Engineering at Indian Institute of Technology Madras. He previously worked at Intel, Bangalore during the period 2011 to 2014 where he was involved in the development of a Functional Model of Intel's Graphics processors. He addressed the II year, III year and IV year students on the various facets involved in presenting and publishing a paper in reputed journals.

The session started off with Mr. Prasanna Karthik sharing the path he took, pursuing a Bachelor's degree in Computer Science at Meenakshi Sundararajan Engineering College and Master's degree in Computer Science at Indian Institute of Technology, Bombay. In this manner, he educated students about the real life requirements and challenges faced in pursuit of higher studies. He clearly differentiated the pros of pursuing a master's degree in India and of pursuing a master's degree, abroad.

This was followed by a small lecture on one of his recent publication "Towards Measuring Quality of Service in Untrusted Multi-Vendor Service Function Chains: Balancing Security and Resource Consumption" in IEEE International Conference on Computer Communications, INFOCOM, 2019. He educated the students about requirements and expectations of reputed journals such as IEEE. He taught the students how to publish a professional paper. What to include and what not to include in such Journal/Conference papers. He shed light on the right way of approaching while coming up with new ideas.

This was then followed by a lengthy Q&A session with the students. This helped the students clear many, with information regarding degree selection, project selection, hot research domains, internships and letters of recommendation and so on. Some students were also given targeted advice on how to prepare a Journal/Conference paper. Nuances of the exams and requirements both in India and abroad were also covered. He also promised to offer Research Intern opportunities for 6 students among the department.

All in all, it proved to be a highly informative and interactive session, students got clarity about pursuing master's degree in India and publishing papers. We would like to thank the management, department and staff for providing us with this opportunity to have a hands-on interactive experience, that we may make informed decisions in pursuit of our respective careers after the completion of our baccalaureate degrees

## SIRIUS WORKSHOP - CODE WITH NODE

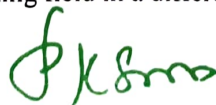

A three day workshop 'Code with Node' was conducted at Meenakshi sundararajan Engineering College by Student Technology Empowerment Program, a Sirius Campus Initiative from 4th jan,2019 to 6th jan,2019 for the students of Computer Science and Information Technology who were shortlisted based upon their answers on the respective workshop registration site.

The first day of the workshop started with an introduction to the bright career opportunities available at SIRIUSCOM for the talented freshers. Followed by that, the basic language for web creation, HTML was taught with its important terminologies covered. Students learnt via hands on approach by designing web pages along with the teaching official. After a short break, a small activity which was both fun and whimsical that encouraged students to work as a team was carried on. After that the students were taught fundamental and extensive concepts of CSS for making the webpage look more creative and attractive. Students learned to create a basic web page using CSS and HTML on the first day of the workshop which ended with a question answer session. Students who were active, attentive and cooperative were provided with small gifts to encourage them to keep that up.

On the second day of workshop students were taught to make their webpage not only creative but also responsive. JavaScript, Json and Jquery were taught from scratch to few fundamental concepts. Hands on approach was followed by the students to get more comfortable in coding the stuffs themselves. Students were introduced into the concept of NodeJS briefly which is an open source platform that is predominantly used by major enterprises. Followed by the fun activities to revive the students' spirit and question answer session, the second day of workshop ended with students learning appreciable knowledge in front end languages.

The third day of workshop began with a commencement on unstructured data and structured data. Students were taken into the learning spree of mongodb which is a document oriented database program. Students worked together with the teaching official to construct the e-commerce webpage with respective front end, middle end and back end. After a small break and a real fun activity to prevent boredom, the session carried on with a preamble to the pioneering field Artificial Intelligence. Students were taught to build a small play bot along with its root algorithms. A hands on approach was followed in order to make students get familiar with realtime working conditions. After quite a long question answer session, the participation certificates were distributed to the students. The officials gave students remarkable tips to get into the field and cope up with the working environment.

The workshop proved to be extremely beneficial for students as they learnt about the technologies that current IT industry is working upon in hands on and interactive way. Blooming technology domains were explained in a simple and efficient. The teaching officials implemented new methods of teaching to keep students always focused and responded to every technical doubt that was asked. Overall, the workshop was a good experience for the students in getting to know their working field in a different perspective.

Respected Vadivel sir

Sub : Free Webinar on" Energy Conservation and Energy

Madam Babai was kind enough to approve the above W

We discussed about the Programme in the Morning tod

The Free Webinar on" Energy conservation and Energy

I (D Rathinasabapathy ) am the Empaneled External Fa  
Petroleum and Natural Gas. I am B.E ., M B A with 36 y

We are interested in taking a FREE Webinar on " Ener  
means of Energy conservation and Enhance their know

Hence it is requested to have the Webinar as follows

College : Meenakshi Sundararajan Engineering College

Date : 15 .12.2021 (Wednesday )

Time : 2 .00 PM to 3.30 PM

No of Students : 30 ( Minimum ) - Pre Final / Final ye

Kindly confirm so that we can proceed and complete .

Regards

D Rathinasabapathy

CHENNAI-600 022

## **D Rathinasabapathy B.E., M.B.A.,**

72A/152, Vellala street, R E Apartments, Purasawalkam, Chennai – 84.

Ph: 9941917204; 044-26426360. E-mail: [72drathina@gmail.com](mailto:72drathina@gmail.com)

### **PERSONAL STATEMENT**

I am Passionate in the Development of People, System Improvement, C S R and Problem solving

### **KEY SKILLS**

- Training
- Development of Quality Circle, Small Group Activity, Cross Functional Team
- Implementation of 5S, POKA YOKE (Mistake Proofing)
- Auditing – Q M S (Quality Management System), E M S (Environmental Management System), O H S M S (Occupational Health & Safety Management System)
- Problem Solving
- Recruitment of Apprentices, Training & meeting the Statutory requirements

### **ACHIEVEMENTS**

- Head (Training & Development) - trained over 4000 Employees at Ashok Leyland.
- Development of people through **Gemba Movement**
- Developed Q C Movement (Prime facilitator) – National level awards.
- Head 5S - implementation of **5S** at Ashok Leyland.
- Elimination of customer issues by Change in process, product – Reliability Enhancement

### **EDUCATION HISTORY**

Institution	Degree	Grade	Duration
Alagappa Chettiar College of Engg & Technology, Karaikudi.	B.E., (Mech)	I Class	1978-83
Madras University, Dept. of Management Studies, Chennai	M.B.A.,	I Class	1989-92

### **WORK EXPERIENCE**

PRINCIPAL  
KODAMBAKUR ENGINEERING COLLEGE  
1007 ROAD, KODAMBAKUR  
CHENNAI-600 024

**ASHOK LEYLAND, Chennai**  
August 1987 – Nov 2019 (32 years)

**Assistant General Manager**  
**(Improvement Cell)**

- Development of Quality Circle Movement.
- Training on 5s, mistake proofing, quality circle, TPM etc.
- Implementation of projects at all plants in India to eliminate/reduce customer issues- Reliability Enhancement
- Planning and Organising C S R activities
- Head of Mission Gembha (Workplace improvement and people development) and 5s.
- Trained teams for various quality circle & 5s competitions and won awards at state, national levels.
- Planning & organising of various programs, competitions and customer visits.
- Operation and Maintenance of HT Gensets.

**PRAGA TOOLS LTD, Hyderabad**  
October 1983 – July 1987 (4yrs)

**Junior Manager**  
**(Plant Maintenance)**

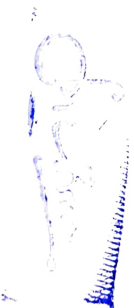

- Maintenance of Forge Shop – hammers, presses, hoist & cranes, air compressors, furnaces, gensets and water pumps.

## **DECLARATION**

I hereby declare that the information given above are true and correct to the best of my knowledge.

Approved by AICTE & Affiliated to Anna University

### ACHIEVE EXCELLENCE PROGRAMME

Topic: Energy Conservation and Energy Efficiency

Date : 15.12.2021 ( Wednesday )

MODE: ONLINE

Time: 2.00pm to 3.30 pm

Participants : Prefinal and final year Mechanical and Electrical students

The lecture focused on the application of Energy Conservation, Energy Efficiency Techniques.

The Live examples from the Industries were shared which enriched the knowledge of the students.

which helped them to have an Insight into the Industries now. They can apply after joining the Industries.

The Nation also will get benefitted by Energy Saving & Reduction of Pollution etc.,

Energy conservation is the effort made to reduce the consumption of energy by using less of an energy service. This can be achieved either by using energy more efficiently (using less energy for a constant service) or by reducing the amount of service used (for example, by driving less). Energy conservation is a part of the concept of Eco-sufficiency. Energy conservation measures (ECMs) in buildings reduce the need for energy services and can result in increased environmental quality, national security, personal financial security and higher savings. It is at the top of the sustainable energy hierarchy. It also lowers energy costs by preventing future resource depletion.

Energy can be conserved by reducing wastage and losses, improving efficiency through technological upgrades, and improved operations and maintenance. On a global level, energy use can also be reduced by the stabilization of population growth.

Energy can only be transformed from one form to another such as from energy to motive power in cars, or kinetic energy of water flow to electricity in hydroelectric power plants. However, machines are required to transform energy from one form to another.. It is possible to print these losses by COLLEGE adopting green engineering practices to improve the life cycle of the components. MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE, KODAMBAKKAM.

Energy conservation day has been celebrated on December 14 every year since 1991.

15/10/24 - Webinar on Energy Conservation & Energy efficiency

Department of EEE

Mr. Kishore Kumaran, Founder and Director of Missile Ingeniator presided over the session with 200 beneficiaries.

The session, titled, 'Scope and Prospects of Entrepreneurship' discussed the challenges faced by a budding Entrepreneur. The speaker brought in all the valuable lessons experienced by him during the initial stages of his entrepreneurship. The advice meant relevant to the young minds as is much is being discussed about innovation and product development.

The speaker answered various questions from the students. The event took place both as online and offline and attended by nearly 200 beneficiaries.

# Chat on Prospects in Core Engineering and Higher Studies

18<sup>th</sup> June 2021

A 'Coffee Table Chat' on 'Prospects in Core Engineering and Higher Studies' was hosted by ETA Bureau of Higher Studies & ETA Industry Institute Consortium of Electrical Technocrats Association on 18.06.2021. The Resource Persons are our Alumni who shared their valuable insights in guiding the second, third and final year students of the Department on getting placements in Core Engineering. The Resource persons answered various questions from the students.

The Resource persons were

Sindhuja Vijayaraghavan, Consultant, Energy Automation, Croonwolter&dros,  
Hariharan Ragothaman, Senior Software Engineer, Athenahealth,  
Bharatwaj Gowrishankar, Senior Software Development Engineer, Philips

National Level Workshop was conducted by the department of EEE, Meenakshi Sundarajan Engineering College on 05-06-2021 from 10.00 am to 12.00 pm. The workshop was conducted by Dr.A.Deepak , Electromagnetic Design Engineer, ePropelled system Pvt. limited, Chennai, has taken a lecture on topic "Motors used for EV applications-Design aspects" . The total number of people participated in the conference was around 250, it included students , professors, industrial people and research scholars. The speaker discussed in detail about the types and the motors used in EV, the workshop also discussed about the possibilities and reach abilities of research and development in the EV field. After his lecture the participants were given time to interact with him. The participants felt that the session was more informative and interactive. At the end of the workshop , the participants gave their feedback, and explained how they were benefited.

# ETA's Coffee Table Chat on Placements and Preparations...

4:30 pm  
2nd May  
2021

ETA Industry Institute Consortium

## Chat on Placements and Preparations

2<sup>nd</sup> May 2021

A 'Coffee Table Chat' on Placements and Preparations was organized by Electrical Technocrats Association (ETA) of the Department of Electrical and Electronics Engineering, on 2<sup>nd</sup> May 2021. The Resource Persons are our Alumni who shared their valuable insights in guiding the second and third year students of the Department on Placements and Preparations. The online event was hosted by ETA Industry Institute Consortium (IIC). The Resource persons answered various questions from the students.

The Resource persons were

G. S. Balaji, System Engineer Trainee, Infosys,

N. Badrinathan, Developer, Zoho Corporation,

Venkata Anamika Reddy, System Engineer Trainee, Infosys,

S. Balaji, Developer, Wipro,

J. Azar Mohammed, Data Engineer Trainee, Cittabase Solutions.
