

AVALANCHE- A ONE DAY TECHNICAL SEMINAR

Avalanche, a one day technical seminar was organized by the department of Electronics and Communication Engineering on the 19th of January, 2019. The seminar was conducted by five distinguished guests Mr.R.Ganapathy, Mr.R.L.Hari Shankar, Mr.Harsha along with Mr.Vasanth and Ms.A.Manjula. It was a very useful and inspiring experience for the students. The ideas and typical lectures brought about by the speakers who had the students wondering in technical world .

The First session of Avalanche '19 was conducted by Mr.R.Ganapathy,a product analyst and technical consultant from EPR Labs .The topic that was mainly focused on was Machine learning . There were many applications of embedded systems discussed during this session. He also discussed on how a mobilized robot has to be designed properly in order to sustain in our environment through videos. The seminar was very interesting and it helped the students to venture more deeply into robotics.Through this seminar, the students gained some ideas to make projects of their own. So it was a eye opener to all students.

The Second session of Avalanche '19 was conducted by Mr.Hari Shankar who is an Aerospace Engineer and the Founder CEO of Hyoristic Innovations. He rendered an inspiring lecture on his passion, his fears and shortcomings during the course of success and space exploration. He insisted that the students understand the different topics in an easy manner by conversing in their vernacular language which made it easier for the students to grasp . His thoughts, opinions and detailed explanation on space science fascinated all and inspired us to pursue their dreams and passions . He gave a lot

PRINCIPAL
MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE
363, ARCOT ROAD, KODAMBAKKAM
CHENNAI-600 026

of information on different kinds of rockets and satellites his company has developed and successfully launched to near space . Finally he concluded by giving some much needed career tips to students.

The Third session of Avalanche '19 was conducted by two electronic design analysts, Mr.Harsha and Mr.Vasanth from Livewire. The topic that was covered during this session, was IoT (Internet of Things) and it really was an eye opener to all the students, as IoT is proving to be a game changer in various fields across the world. The session provided thought-provoking information about the current trends in IoT and gave the students an idea about fascinating projects that could be implemented using the same.

The seminar ended with the Fourth session which was about PCB board design by Ms.A.Manjula from Livewire. Ms.Manjula has been in teaching sector for past 3 years. The lecture started with the introduction of what PCB board and its applications. This was followed by designing it using hardware and software and different models of designing PCB board was explained. The specifications of the components was taught and different ways of soldering the components was discussed. This session was very useful and interactive.

Thus that day turned out to be an unforgettable experience for all the students.

Respected Sir/Madam,

I am glad to inform you that ECE dept of MSEC will be organizing a one day technical seminar every year under the title AVALANCHE. This year we have scheduled the event on 19th Jan,2019 (Saturday). We feel privileged in inviting you for Avanalanche 2019. We also look forward for your support in delivering a technical talk to our students on that day in the afternoon session (1pm to 2:30pm). Looking forward for your confirmation regarding the same.

Thanking you,

Mrs.Siji Raaja ,B.E.,M.Tech,MIETE

Hi Madam,

Its our pleasure to be associated with your organization technical seminar event on 19-1-2018 and assure that will deliver the best possible lecture session to the students and kindle their innovative ideas.

Looking forward to be associated with your organization through our various technical services like Workshops, Value Added Programs and Center For Excellence in Artificial Intelligence and Robotics.

Hope to take our interaction to the next level.

kindly revert back for queries if any at 9486806486 / 9080589766.

With regards,
Ganapathy R

WORKSHOP ON ANTENNA DESIGN

Workshop on Antenna Design was conducted on 28th June, 2018 by Mr. S. Dinesh Moorthy.

The seminar was about how to design an antenna. The students of ECE attended the session and it was very useful for them in gaining knowledge about it more than learning the theoretical content of the same topic.

One of the antenna designing techniques which he taught was to design the dimensions of an antenna using Ansoft HFSS. The most required elements for simulating such designs were given by wave port, transmission line, antenna, ground plane and radiation box.

This was explained along with other Antenna designing tools as well. The Antenna designing software tools were shown as presentation and also basic tool was shown as demo.

The hands-on experience with such tools and designers made to experience the real process through which communication can be established.

Overall it was a good experience and thus students were able to learn a lot through this session about the use of antenna practically all over the world with a basic demonstration and further more with the hands-on experience.

Chief Guest: MR.PARTHIBAN (LEMA LABS)

Technology is the key to advancement, so as engineers we need to know the advanced technologies that would help to build the surrounding environment. It was a very interactive session as he first taught the students how to write the coding for the robots and then made all the students to develop their own code to build a robot. He also taught the students about the basic operation of the robots and how to build a robot to enhance its stability. He made the students to think out of box as to how different kinds of robots can be built even by knowing the basic skills in the robotics. Students also learned about how robotics can be incorporated along with various other technologies such as internet of things. It was very interesting to know about how students can design and implement our own robots. Thus the seminar was a knowledgeable one for the students. As there was much of a practical applications during the workshop, all the students were very much involved in learning the new technology. He also made them realise that building a robot is not such a difficult task and that anyone can learn it but one needs to implement it what they have learned. And as ECE students they very much liked the workshop as they could relate to their own core field.

REPORT

NCAET'19- A NATIONAL CONFERENCE ON ADVANCEMENTS IN EMERGING TECHNOLOGIES

The National conference on advancements in emerging technologies, NCAET was conducted on March 2nd 2019 by the department of ECE and ELECSA. The chief guest of the conference was Mr.N.Sriram, who is leading in AI and the director of data science in the Cognizant Technology Solutions. He is an experienced accomplished professional with 21 years of experience and encompasses implementation of various transformational initiatives in the technology and people related domains for global brands across different industries. He has keen interest in driving AI and data science based solutions for businesses and is currently leading the build of AI enabled solutions to help drive digital transformation in the insurance industry. He is also passionate about applying AI for social good in solving safety, security and environmental challenges that we face in our society today. His interactive speech on the present developments of AI was very useful for the students and enlightened us on the current topics in the electronic developments and it's applications.

The chair person who attended the conference for the first session was Dr.M.Thilakavathi who holds a doctorate in bio signal and image processing domain from the CEG, Anna University. She has published various international journals and has attended many international conferences in India and abroad.

The second session was graced by the presence of Dr.M.Selvi, secretary of IETE, Saveetha Engineering College and Dr.Balaji, assistant professor in ECE department at Loyola ICAM. In this occasion students from various colleges took seminar on various topics. IOT, machine learning, proximity systems and also various health monitoring technologies were presented in conference by the students. It was very helpful since students who took the seminar can themselves learn about the new technologies in the present day life and also can make other students aware of the developments in the industry.

Thus the event in total was very knowledgeable for the students and also encouraged the other students to take part in conferences and to present the seminars about the current topics.

NATIONAL CONFERENCE ON ADVANCEMENT IN EMERGING TECHNOLOGIES

Organized by

DEPARTMENT OF ECE

MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE

Chennai - 600024

ABOUT US!

Meenakshi Sundararajan Engineering College(MSEC) is a part of the prestigious KRS Group of Institutions which also includes the renowned IET (Indian Institute of Engineering Technology) established in 1947 by our Founder Late Shri K.R.Sundararajan. The college was established in July 2001 by the efforts of Dr.K.S.Lakshmi and Dr.K.S.Babu, the illustrious daughters of our founder Shri K.R.Sundararajan. The management strives constantly to be a Centre Of Excellence that imparts education to students, grooming their personality face the challenges of the industry and the nation at large.

25

ABOUT THE DEPARTMENT

The Department of *Electronics and Communication Engineering* was started in the year 2001 with the inception of the College. This eighteen-year-old department shares the mission and vision of the Institute in imparting quality education to the students. The department has been efficacious in offering its students the opportunity to work on diverse platforms with eight well equipped laboratories with the latest hardware and software facilities sufficient to quench the thirst of budding engineers. Our alumni have brought laurels to the Institution by securing 40 university ranks so far. This conference on 28 March, 2019, being the 6th National Conference on Advancement in Emerging Technologies (NCAET) the department has also conducted an International Multi-Disciplinary Conference on Solar Energy (IMXSE) in 2012, a National Conference on Recent trends in Electronics and Communication Engineering (NRECE), an International Conference on VLSI and Communication Systems (ICVLSI COM-10) and various technical seminars, guest lectures and industrial visits every year to further enhance student's knowledge.

Original contributions of on-going research & published research works/surveys are expected. Authors are requested to submit a soft copy of full length research paper for presentation in the following format:

PRINCIPAL
MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE
363, ARCOT ROAD, KODAMBAKKAL
CHENNAI-600 023

CALL FOR PAPERS:

*PAPER FORMAT:

IEEE double column, A4 fourpages.

All papers have to be sent by mail.

Font type : Times New Roman, Font size-10

Paper title : Center and bold, Font size-14.

TOPICS OF INTEREST:

The topics of interest include, but are not limited to the following research areas:

- VLSI & Embedded System
- Signal & Image processing
- Wireless communication & Networks
- Nanotechnology
- Network & Information Security
- Opto Electronics
- Robotics
- Biomedical Instrumentation & Telemedicine
- MEMS
- Internet Of Things(IOT)

ABOUT THE CONFERENCE:

The aim of the conference is to help connect the dots that needs to be connected. The world appears increasingly complex, and to grab and develop the opportunities ahead we need a wider perspective. This conference provides an opportunity for students, experts from institutions and industries to discuss and share their experiences in the emerging recent trends of Electronics & Communication Engineering. This event is forum to put forth various innovative research ideas of various domains in the electronics and communication field.

Registration:

For encouraging young researches and students of young aspiring minds to Present a paper in our conference and also participants we make free Registration (Accommodation and Travel allowance will not be provided)

Correspondence : Mr.M. Vadivel, Asst. Prof., Mechanical
Mob No : 9080010632 / 9840940383
website : www.ncdmems2019.com
E-mail : ncdmems2019@gmail.com

Important Dates:

Last date for Full Paper Submission: 4th March, 2019
Intimation of Acceptance: 5th March, 2019
Last Date for Registration: 6th March, 2019
Conference Date : 8th March, 2019

Conference Topics:

The conference will have presentation session covering various discipline of mechanical engineering however; the topics are not limited to this list given below.

- Thermal Engineering
 - Powder Metallurgy
 - Composite Materials
 - Nano material processing and Advanced Materials and Metallurgy
 - Welding Technology
 - Automobile Engineering
 - Advanced Manufacturing Processes
 - Non-Destructive Testing
 - Advanced Materials and Metallurgy
 - Advancement in IC Engines
 - Fluid Flow Mechanics
 - Heat and Mass Transfer
 - Manufacturing Technology
 - Product Design & Development
 - Finite Element Analysis
 - Internet of thing's (IOT)
 - Computation Fluid Dynamics
 - Renewable Energy
- Other Mechanical related topics are acceptable.

Talk by: Dr. Aruna Shekar, Senior Lecturer,

School of Engineering and Advanced Technology.

To become an Entrepreneur, it is important to know the situation outside the country. It is essential to have a thorough knowledge on the International market and opportunities for trade outside the country. On the 25th of July 2018, Dr. Aruna Shekar, Senior Lecturer from the School of Engineering and Advanced Technology gave a talk on the Educational opportunities in New Zealand and the scope for new ventures there. She opened up a whole new prospect to setting up a business and gave a different perspective to the students. Her speech motivated the students to reach high and set high goals. Overall she inspired to students to aim big and meticulously pursue their dreams.

The initiative has lit a spark in the students to go out and start their own establishment. As Engineers, not all have to work under Corporations. Engineers with a burning passion to create a change and bring about a revolution in a particular field can very well go out and pursue it. The E-Cell initiative has prodded the students to think beyond getting a job and has given them the platform to explore other options. Hoping that the initiative will give birth to a lot of entrepreneurs in the upcoming years.

Talk by: Mr.Kishore Kumaran,

Missile Ingeniator

Entrepreneurs are a very important cog in the machinery of a country's economy. This is why developing budding Entrepreneurs is an important function. Our College E- Cell has tried to give the students the best possible motivation by addressing students with speakers who have accomplished in their respective fields. On 27th December 2018, the students were addressed by Mr.Kishore Kumaran, an Alumni of our college who has become an entrepreneur and has his own start up "Missile Ingeniator". He spoke about the different business plans and strategies that should be followed to become an entrepreneur and how to achieve them. He also spoke about how to define our vision, objectives that should be followed, to create a simple action plan, how to finance the start up. Hoping that the entrepreneurship development programme equipped students with the required skills and knowledge needed for starting and running the enterprise.

Sub: Invite to act as resource person for one day technical seminar.

Respected Sir,

To enhance the technical skills & knowledge of our students technical seminars are being arranged on topics outside the curriculum. In this connection , for the students of EEE Dept, we are arranging a lecture session , for which I request you to kindly be a resource person for the lecture on the topic “ SMART GRIDS“ on 18-01-19. The students will be benefitted by the lecture & the knowledge imparted to them .

Kindly treat this letter as invitation for the lecture.

Thanking you,

Regards,

(K.Rajeswari)

REPORT ON TECHNICAL SEMINAR

B. Niranjani.
EEE II year
311517105030.

This report is about what we learn in technical seminar on 18th January 2017. The topics to be discussed is smart grid and pv systems.

SMART GRID.

Introduction

The smart grid has many benefits like decreased the cost of block outs, aids to measure and decrease the consumption of energy, aids the business to decrease their carbon footprints and bring modern opportunities for the technical firms and it means that the job opportunities are created and available for the people. There are many definitions related to the smart grid and some are depending on its working parameters, few are depending on its mechanism and few are benefits oriented. The word smart grid describes a smart grid and it is in use since, from 1997, the most common feature in the definitions of the smart grid is the digital processing and exchange of information to the power grid.

Why smart grid?

The smart grid refers to an advanced electricity supply bond which runs from a major power plant to all the way inside your home.

When the electrical power gets near your town or city or village then the high electrical voltage is decreased in a process called stepped-down, the voltage value is decreased in an electrical substation for the distribution in an area. The most important concept of the smart grid is to include the capabilities of monitoring, analysis, control and communication in the national electrical delivery system to improve the output of the consumption of energy.

Who is using the smart grid?

- * Individual consumers
- * Corporate participants and
- * Government regulations.

Components of the smart grid:

- * Smart meter.
- * Phasor measurement
- * Information transfer
- * Distributed generation

COMPARISON:

EXISTING GRID	SMART GRID
Electromechanical	Digital
one-way communication	Two-way communication
centralized generation	Distributed generation.
Few sensors	sensors throughout.
Manual monitoring	self-monitoring
Manual restoration	self-healing
failures and blackouts	Adaptive and islanding

FEATURES:

- * Reliability
- * Flexibility in network topology.
- * Efficiency.
- * Time of use pricing
- * Sustainability.
- * Market enabling
- * Demand response support
- * platform for advanced services.
- * provision megabits.
- * control power with kilobits.
- * see the rest.

PRINCIPAL
MEENAKSHI SUNDARANAMI ENGINEERING COLLEGE
362, ARKOT ROAD, COCHINBAGANAM,
CHENNAI-600 024

Advantages:

- * The smart grid furnishes low costs.
- * The production, installation and work, maintenance of the smart grid and the components of the smart grid bring new jobs to the people and hence it works for the economic development.

Disadvantages:

- * Some type of meters in it can be hacked.
- * It is expensive when it comes to the installation and requires many technological components.

Contents discussed above:-

- * Introduction
- * Why smart grid?
- * Who is using smartgrid?
- * Components of smart grid.
- * Comparison
- * Features
- * Advantages
- * Disadvantages.

PV systems:

SOLAR CELL:

It is basically a bulk silicon cell where the bulk material is the p-type silicon. A thin layer of n-type silicon is formed at the top surface. There is anti-reflective coating, textured rear surface.

SOLAR PV MODULE:

It is the basic building block of a PV system. It is the interconnection of a number of cells and all these cells should have the same characteristics. partial shadowing may damage the module.

Solar PV system classification:-

Central power station system

Distributed system

Stand-alone system

Grid-interactive system

Hybrid solar PV system.

Factors affecting solar panels:

* Temperature

* Shading

* Dust

Advantages:

* Less expense due to no use of battery

* Little maintenance required

PRINCIPAL
MEENAKSHI SUNDARARAM ENGINEERING COLLEGE
363, ANTOY ROAD, ERODE DISTRICT, TAMIL NADU
605 006

* Save money due to net metering.

Disadvantage:

- * More costly to install.
- * Requires more maintenance.

CONCLUSION:

I learn more about the topic smart grid and pv system. The Seminar is more interactive and it gives more knowledge about my career. I learn a different kind of softwares that is helpful for the career.

REPORT ON TECHNICAL SEMINAR.

TOPICS COVERED:

↓ Smart grid

↓ PV SYSTEM

GRID:

It is a group of alternator (or) generator units connected and which cross each other to form a series of square and rectangle. It forms a pattern.

POWER SYSTEM:

It is a network of electrical components developed to supply, transfer and use electric power. It is in form of grid.

TRANSMISSION LINE:

It is line where power is stepped down by the transformer and delivered to many substations.

To achieve a modernized smart grid a wide range of technologies generally grouped into.

- ⇒ Intelligent appliances
- ⇒ Smart power meters
- ⇒ Smart substations
- ⇒ Super conducting cables.

Discussing about its advantage, it would be a good source of renewability and reduce carbon emissions.

PRINCIPAL
MEENAKSHI SUNDARARAO ENGINEERING COLLEGE
263, ARLOT ROAD, SODABAKKAM,
CHENNAI-600 024

PV SYSTEM:

PV Syst is designed to be used by architect, engineers & researchers. It is also a very useful educative tool. It includes a detailed contextual help menu that produces and models that are used and offers a user-friendly approach with a guide to develop a project. PV Syst is able to import metro data, as well as personal data from many different sources.

HOMER SOFTWARE:

It is a free software application developed by National Renewable Laboratory in United States. This software application is used to design & evaluate technically and financially the options for off-grid and on-grid power systems.

Other software for solar PV system:

- * PV F-chart USA
- * PV planner
- * PV Syst
- * Solar Pro

* NREL (National Renewable Energy Lab)
owns System Advisor Model (SAM).

ENFRONT-500 026

SESSION - I

SMART GRID

CONTENT

- * Introduction
- * Block diagram
- * Need of Smart Grid
- * Comparison between Smart Grid and Conventional Grid
- * Components of Smart Grid
- * Application
- * Advantage
- * Disadvantage
- * conclusion.

SESSION - II

PV Systems

CONTENT

- * Introduction
- * HOMER APP

PRINCIPAL
MEENAKSHI SUNDARARAM ENGINEERING COL
262, AKKOT ROAD, KOCAMBAKKAM,
CHENNAI-600 026

SMART GRID:

- * Modernization of grid & digitalization
- * Two way communication & prevention of blackouts
- * Combination of renewable energy sources

Adding sensing, embedded processing and digital communications makes the grid:

Self healing

Interactive

Optimized

Secure

Predictable

Distributive

Need for a Smart Grid:

- * Conventional grid has electromechanical arrangements, which are highly inefficient.
- * False tripping & Frequent power failure
- * Energy demand is increasing at a faster rate than energy supply because of the increase in population

COMPARISON

Existing Grid

Electromechanical
one way communication
Few sensors
Manual monitoring
Manual Restoration
Failures & Blackouts
are possible.
Centralized Generation

Smart Grid

Digital
Two way communication
Sensors throughout
Self monitoring
Self Healing
NO blackouts
Distributed generation

Components of Smart Grid

- * Smart meter
- * Phasor measurement
- * Information transfer
- * Distributed generation

Application [plug in electric vehicle]

- * Not charging when load demand is more
- * Optimally charged at low peak & at peak wind power

Advantages:

- * Better energy management.
- * Reduce carbon emissions
- * Better demand supply
- * Proactive management of electrical network during emergency situations

Disadvantages:

- * Present infrastructure is inadequate & requires high cost of installation.
- * Smart grid is computer based if it is hacked then worst thing will happen.
- * Most renewable energy sources are intermittent & not reliable

Conclusion:

- * Using this technology energy can be utilized to the maximum and would not be wasted.
- * This technology also helps to save earth from the global warming.

Session - II

PV System

PV system is designed to be used by architect engineers and researchers. It is also a very useful educative producer and models that are used and offers a users friendly approach with a guide to develop a project.

HOMER SOFTWARE:

It is a free software application developed by the National renewable laboratory in the US. The software application is used to design and evaluate technically and financially the options for off-grid and on-grid power systems.

Other software for solar PV system.

PV-E chart USA

PV planner

PV syst

NREL (National Renewable energy lab)

SAM (System Advisor Model)

Conclusion:

The technical seminar was very useful and informative. I learnt many things to improve my knowledge.

Conducted on:-

18/01/19

Friday

TOPICS COVERED:

- 1) SMART GRID (F.N) (2) PV system

GRID:-

It is a group of alternators (or) generating units connected and which cross each other to form a series of square and rectangles. It forms a pattern.

Google car is a driverless car with many sensors placed on it like Li-DAR. It receives data from google software and accurately identify other road users and their behaviour patterns and highway signals.

POWER SYSTEM :- It is a network of electrical components deployed to supply, transfer, and use electric power. It is in form of grid. Transmission line is the line where the power is stepped down by the transformer and delivered. Many substations are involved from where the power to a lower voltage and delivered to transmission line.

distribution line is a line or system for distributing power from a transmission system to a consumer that operates at less than 69,000 volts, when a voltage greater than 1KV and less than 40KV. then it is called distribution line.

The technical losses are due to energy dissipated in the conductors, equipment used for transmission line, transformer, substation line and distribution line and magnetic losses in transformers. The major amount of losses in a power system is primary and secondary distribution lines.

Hybrid Car:

It uses two or more distinct types of power, such as internal combustion engine to drive an electric generator that powers an electric motor. Eg in diesel - Electric trains, and submarines that uses diesel when surfaced and batteries. other means include hydraulic hybrids.

The basic principle with hybrid vehicles is that the different motors work better at different speeds, the electric motor is more efficient at producing torque / turning power.

MART GRID:

It is an electrical grid which includes a variety of operational and energy measures including smart meters, smart appliances, renewable energy resources, and energy efficient resources.

The digital technology allows two-way communication between the utility and its customers and the sensing along the transmission lines is what makes the grid smart. It is automation and new technologies working together.

- * More efficient transmission of electricity
- * Quick restoration of electricity.
- * Improved security.

PV- syst.

PV syst is designed to be used by architect, engineers, and researchers. It is also a very useful educative tool. It includes a detailed contextual help menu that explains that procedures and models that are used, and offers a user-friendly approach with a guide to develop a project. PV syst. is able to

import meteo data, as well as personal data from many different sources

HOMER software:

It is a free software application developed by the National Renewable Energy Laboratory in the United States. This software application is used to design and evaluate technically and financially the options for off-grid and on-grid power systems for remote, stand-alone and distributed generation applications

other software for solar PV-syst

- 1) PV-F chart - USA
- 2) PV planner
- 3) PVsyst
- 4) solar pro
- 5) NREL [National Renewable Energy Lab] owns System Advisor Model (SAM).

SMART GRID TECHNOLOGYGRID :

It is a group of alternators (or) generating units connected and which cross each other to form a series of squares and rectangles. It forms a pattern.

GOOGLE CAR : is a driverless car with many sensors placed on it like Li-DAR. It receives data from google software.

POWER SYSTEM : It is a network of electrical components deployed to supply, transfer, and use electric power. It is in form of grid.

TRANSMISSION LINE : is the line where the power is stepped down by the transformers and delivered. Many substations are involved from where the power to a lower voltage and delivered to transmission line.

DISTRIBUTION LINE : is a line or system for distributing power from a transmission system to a consumer that operates at less than 69,000 volts. When voltage greater than 1kV and less than 40kV

Intelligent Appliances

Smart Power meters

Smart substations

Super conducting cables

Integrated communications.

Pv - syst

Pv syst is designed to be used by architect engineers and researches. It is also a very useful educative tool. It includes a detailed contextual help such that Procedures and models that are used and offers a user - friendly approach with a guide to develop a Project Pv - syst is able to import metro data :

HOMER SOFTWARE:

It is a free software application developed by the National renewable laboratory in the united States. This software application is used to design and evaluate technically and financially the options for off - grid and on - grid Power system

A Report on Technical Seminar

Prepared by

T. Yogalakshmi, EEE/IIyr

Submitted on,

22nd Jan 2019.

Introduction:

The technical seminar (one day) held on 18th January 2019, was conducted in two sessions. The first session covered 'smart grids' while the second session gave the students a brief idea of 'PV syst' and their design.

Smart grid:

A smart grid uses digital technology to improve the reliability, security and efficiency of the electricity system.

Concerns:

The following areas arguably represent a reasonable partitioning of the electricity system, that covers the scope of smart grid concerns.

Distributed energy resource technology

Delivery transmission and distribution infrastructure
central generation

Information network and finance.

Characteristics:

Accommodates all generation & storage options

Enables new products, services & markets

operates resiliently to disturbances & Natural disaster

Grid enabled bi-directional communication & energy flows :-

Demand response technologies, which involve bi-directional

flow of information between home equipment and grid.

Distributed generation and storage:

DG has the capacity to help alleviate peak load during emergency.

Challenges:

Implementing demand response, monitoring & communicating loads & prices and developing the standards required to ease the integration of these resources.

Expensive

Complicated in the amount of energy transmitted.

Recommendations:-

Incorporation & tracking of the consumer perspective or analysis of consumer responses to smart grid elements

Further evaluation of privacy and data access policies including consumer & 3rd party access to data.

Conclusion:-

Grid covers broad array of electricity system capabilities & ~~services~~ services enabled through pervasive communication and information technology with the objective of improving reliability operating efficiency impact on the environment.

A Report on Technical Seminar

Prepared by,

R.K. Harini, EEE / II yr

Submitted on,

22nd Jan 2019

Introduction:

The technical seminar (one day) held on 18th January 2019, was conducted in two sessions.

The first session covered 'Smart Grids' while the second session gave the students a brief idea of 'PV syst' and their design.

Session-I:

The morning session, of 3 hours, successfully engaged students in the discussion. Though the main idea of the session was 'Smart Grid', the students got to gain a lot of awareness and knowledge of the field (electrical). This 3-hour interactive session, covered a lot of issues faced in the electrical field. The impact of the production, generation and distribution of electrical energy across the country on the country's economy was briefed and the ideal and expected role of an electrical engineer in this area was brought to light. Further, the discussion extended into India's energy sector realities and its emerging needs. This was illustrated effectively by giving a comparative study of the nation's priority, the current situation and the corresponding implications involved. Further, this lecture ventured into ideas like meeting demand

shortage, clean energy development, the project R-APDRP and the subsequent improvements and developments in field. Further, lecture dwelled on the 3D's of energy transition - Digitalisation, Decentralisation and Decarbonisation eventually leading to renewable energy, its integration issues and their possible solutions. All the above discussion and lecture finally led into a deep and good understanding of a grid, a smart grid, and self healing grids. A detailed, illustrative and interactive lecture on smart and self healing grids was delivered. This lecture left too little to queries and was winded up with inspiring message from the lecturer and motivated students eager to learn more.

Session-2:

The second session, of 2 hours, comprised of a brief rundown of the current possibilities for projects and began with introduction on solar energy and PV cells. It was further detailed on the topic of 'PV syst'. A detailed step-wise guidance was briefed on the design of PV based models for various models were given. The various software available for such designing that are commercially benefitable and student friendly were discussed. The session wrapped up with different ideas for projects.

Conclusion:

Both the sessions were very informative and interesting. The first session was quite interactive and engrossing. Both the sessions was successful in delivering new ideas and delivering the required knowledge and awareness in our field leaving us with lot of ideas for our further improvisation.

INTRODUCTION :

opportunities are created and available for the people. There are many definitions related to the smart grid and some are depending on its working parameters, few are depending on its mechanism and few are benefits oriented. feature in the definitions of the smart grid is the digital processing and exchange of information to the power grid.

SMART GRID :

The smart grid refers to an the advanced electricity supply bond which run from a major power plant to all the way inside your home. the most important concept of the smart grid is to include the capabilities of monitoring, analysis, control and communication in the national electrical delivery system to improve the op of the consumption of energy.

COMPONENTS OF THE SMART GRID:

Smart meter

phases measurement

Information transfer

Distributed generation

COMPARISON:

EXISTING GRID

Electromechanical

one way communication

centralized generation

Few sensors

manual monitoring

Manual restoration

SMART GRID

Digital

Two way communication

Distributed generation

sensors throughout

self - monitoring

self - healing

Adaptive and is learning

FEATURES:

Reliability

Flexibility in network topology

Efficiency

Time of use pricing

sustainability

Market enabling

Demand response support

platforms for advanced services

provision megabits

control power with kilobits

Advantages:

The smart grid furnishes low costs
The production, installation and work, the
maintenance of the smart grid.

Disadvantages:

some type meters in it can be
hacked

CONCLUSION:

I had an informative time, It was
useful for me. I got new idea and thoughts
I gained more information about smart
grid. It was more technical

SOLAR CELL :

It is basically a bulk silicon cell where the bulk material is the p-type silicon. A thin layer of n-type silicon is formed at the top surface. There is antireflective coating + textured rear surface.

SOLAR PV MODULE :

It is the basic building block of a PV system. It is the interconnection of a number of cells and all these cells should have the same characteristic.

Solar PV system classification :

central power station system

Distributed system

stand alone system

Hybrid solar PV system

Grid - interactive system

Factors affecting solar panels

Temperature

shading of sun

Dust

Advantages

less expense due to no use of the battery

little maintenance required.

REPORT ON TECHNICAL SEMINAR

BY

S. DURGA

EEE - IInd yr

SUBMITTED ON

22 JAN 19

INTRODUCTION:-

Technical seminar was conducted in two sessions on 18th JAN 19. The topic was about 'SMART GRID' and 'PV-SYST'.

SMART GRID:

The first session was about SMART GRID. During that session we had a complete layout about smart grid and its features, advantages.

Smart grid is nothing but a modernization of grid and digitalization. A two way communication and prevention of blackouts can be done by smart grid.

The need of smart grid is for conventional grid has electromechanical arrangements, which are highly inefficient false tripping and frequent power

failure can be avoided. As our energy demand is increasing at a faster rate than the present energy supply because of the increase in population and their growing demands. Considering the above needs we can conclude say that smart grid can overcome these problem.

If any problem occurs in the grid system or any shortage of power supply or any other problem occurs smart grid has the capacity of self healing the problems that has been occurred.

Self healing, interactive, optimized, secured, predictable and distributive features of smart grids is because of the sensors, embedded processing and digital communications made in the grid. As we already know that everything has its own advantages and disadvantages.

The disadvantage of smart grid is that it requires high cost of installation and its not reliable as it is computer based it can be hacked

PV - syst :

The second session was about PV - syst . The session was very useful as we learnt about some programs about PV syst . PV cells were also discussed . HOMER software was also discussed the application of software is used to design and evaluate technically and financially the options for off-grid and on-grid power system .

CONCLUSION :

The session was very useful and we learnt a lot of things about smart grid and pv-syst .

Smart Grid Technology:

Nowadays, the electric power system is a radical transformation in worldwide with the decarbonise electricity supply to replace aging assets and control the natural resources with new information and communication technologies. A smart grid technology is an essential to provide easy integration and reliable service to the consumers. A smart grid system is a self sufficient electricity network system based on digital automation technology for monitoring.

The smart grid can be defined as a smart electrical network and smart digital communication technology. To achieve a modernized smart grid, a wide range of technologies should be developed. These technologies generally grouped into following key technology areas as.

- Intelligent Appliances
- Smart power meters
- Smart substations
- Super conducting cables
- Integrated communication

Discussing about its advantages, it would be a good source of renewability and reduce carbon emissions.

PV - SYST :

PV-syst is designed to be used by architect, engineers and researchers. It is also a very useful educative tool. It includes a detailed contextual help menu that procedures and models that are used and offers a project. PV-syst; is able to import meteorological data, as well as personal data from many different sources.

HOMER SOFTWARE :

It is a free software application developed by the National Renewable Energy Laboratory in the United States. This software application is used to design and evaluate technically and financially the options for off-grid and on-grid power systems for remote, stand-alone and distributed generation application.

OTHER SOFTWARE FOR SOLAR PV - SYST :

REPORT ON TECHNICAL SEMINAR

Prepared by

Brian Samuel

II year, EEEdept

311517105009

Conducted by the Dept. of Electrical and Electronics Engineering.

* Introduction:

The technical seminar was conducted on 18th January 2019 by TANGEDCO which consisted of two sessions. The first session was about smart grid Technology and the second session consisted of a solar energy power plant designing program/software called as PV-syst. The two sessions were held for one day.

* Session - I: Smart Grid Technology.

Mr. Balamurugan K of TANGEDCO explained how power grids work (Present day) and illustrated the disadvantages of our modern day power grid. He also explained the losses occur in the power generation, transmitted power and the effect of power production on our economy. He strongly suggested to upgrade our power grids to smart grids to reduce distribution losses and immediate consumption of electric power. He also encouraged the practice of 3'R's (Reduce, Reuse, Recycle), 3D's - (Decarbonization, Digitalization, Decentralization) and to work on renewable energy sources such

as solar energy. Finally he encouraged all students to understand the vast subject of engineering and to research on the cons of modern day equipment.

* Session - II "PV syst", A Solar PV Power Plant designy software

The second session was conducted by Venkateshwaran. G from AAS. He taught us about the software known as "PV syst" which is used to design a solar power plant which includes area for construction, capacity of the plant, efficiency, scale etc. and the seasonal effects of solar PV. There are two major designy used in PV syst: Preliminary and Detailed design. The preliminary design roughly calculates the cost, area, capacity considering other parameters like tilt angle, azimuth angle, shading effect etc. Detailed designy calculates the total amount req^d of cells, types of cells to be used, inverter and battery spec etc. He also spoke about operating factor which can be relatable to operating efficiency. There are other softwares such as PV planner, Homer etc for which he gave a gist and enlightend us about the scope of Power plant designy.

* Conclusion: In conclusion, the information brought about by the two sessions were very informative and I believe will help us learn more about our subject.

CHENNAI-600 024

ABOUT THE INSTITUTION

Prof. K. R. Sundararajan, one of the eminent educationists of south India established Indian Institute of Engineering Technology (IET) in the year 1947. Prof. KRS dream came into reality through Dr. K. S. Babai when Meenakshi Sundararajan Engineering College (MSEC) started functioning in July 2001. Presently MSEC offers 6 Engineering U.G. programmes in Civil, Computer Science, Electrical & Electronics, Electronics & Communication, Information Technology, Mechanical Engineering and a P.G. programme in Construction Engineering & Management.

The 17 year old engineering College has been ranked in top position twice among the various affiliated institutions in Tamil Nadu under Anna University. The college conducts National and International conferences regularly on the latest trends in academics and industry. A Research center has been established in the campus, recruiting eminent Scientists and Engineers to lead the Institution in the research line.

OUR DEPARTMENT:

The Electrical and Electronics Engineering Department of MSEC commenced in the year 2003. The department lays emphasis on equipping its students with conceptual knowledge and comprehensive technical training to meet the requirements of the industries. The college gives importance for practical training in latest developments & effective student participation in many activities. The events are planned & organized in a manner to improve the overall personality of the students in various fronts.

SCOPE OF THE CONFERENCE:

The Objective of this National Conference is to provide a platform for Researchers, Academicians, Developers and Students to share their knowledge and expertise for their mutual and social benefits. The focus of the conference will be on all the facets of current Technological Innovations and related issues in Electrical and Electronics Engineering

CONFERENCE TOPICS:

- Modelling & simulation to Electrical Engineering
- Intelligent and Soft Computing techniques to Electrical Engineering
- Internet of Things
- Renewable and Sustainable Energy Systems
- Feedback Control Systems
- Power Quality and its enhancements
- Embedded Systems
- Electric drives and applications
- Nano Technology and Artificial Intelligence
- Robotics & Automation
- Smart grid technology
- Power Converters modelling
- Power system protection and stability

PAPER SUBMISSION:

Authors are requested to send the soft copy of the technical paper as per IEEE double column format, Times new roman with a font size of 10 throughout the text including figure caption in A4 size not exceeding 6 pages to the following Email address.

ncepe19@gmail.com

IMPORTANT DATES:

Last date for Paper Submission: 15.02.2019
Intimation of Acceptance: 22.02.2019
Last date for Registration: 25.02.2019
Last date for Camera Ready Copy: 25.02.2019

REGISTRATION :

Academicians, Research Scholars &
Participants from Industries: Rs. 500
U.G. / P.G. Students: Rs. 300

Registration fee has to be sent by demand draft drawn in favour of "MSEC Seminar Fund" payable at Chennai.

PUBLICATION IN JOURNAL

Selected papers would be recommended for publication in International Journal Of Advanced Reserch in Electrical ,Electronics & Instrumentation Engineering (IJAREEIE), ISSN(ONLINE) :2278-8875 on participants request. publication charges are applicable

INSTRUCTIONS

- Registration fee includes Conference kit refreshment, lunch, etc.
- Acceptance/rejection Letter will be sent to the authors as soon as review process is over.
- If co author wants to participate ,he/she has to pay Rs.300 per head.
- Certificate will be provided to all the participating authors.

National Conference on Trends in computing Technology

NCTCT' 19

March 02, 2019

The Department of Computer science and Engineering, Meenakshi Sundararajan Engineering College, in association with CSI Students Chapter organized a National Conference on "**Trends in Computing Technologies**" on **March 02, 2019**. The conference was inaugurated by Mr.N.S.Bharath Kumar, Scientist –D, DRDO, Research and Innovation Center, Chennai. It was followed by a Key note address by Mr.N.S.Bharath Kumar, On "Online Security" which included security in E-mail, E-Commerce, E-Transaction and E-Governance.

The researchers, academicians, industrialists and UG / PG students were invited to submit their original contributions of ongoing research on the areas like (but not restricted to) Grid Computing, Data mining, Big Data Analysis, Artificial Intelligence , Soft Computing, Mobile Application development, Internet Of Things, Wired / Wireless Networks, Computer Vision and Big data. An overwhelming Nation Wide response of about 60 papers was received out of which 12 papers were selected for presentation in the conference.

The Conference provided an interactive forum to the academicians and research scholars of various institutions to share their knowledge by bringing out their innovative ideas and research works in addressing the cutting edge issues related to Computer Science and Engineering.

The sessions were chaired by the following eminent resource persons

- Mr.N.S.Bharath Kumar, Scientist –D, DRDO
- Dr.B.S.Charulatha, Associate Professor/ Prof, Rajalakshmi Engineering College
- Dr.R.S.Ponmagal, Professor, M.G.R University.
- Dr.D.Thenmozhi , Associate Professor, SSN College of Engineering.

Feedback Form

Please respond to the following questions by ticking one box only for each question.
 Your views are very important and will help us to improve our events, facilities, etc.

Scoring Example

6	5	4	3	2	1
---	---	---	---	---	---

1 Overall, my satisfaction with this event

high

					<input checked="" type="checkbox"/>
--	--	--	--	--	-------------------------------------

 low

2 The relevance of the event for my current work

high

					<input checked="" type="checkbox"/>
--	--	--	--	--	-------------------------------------

 low

3 The usefulness of the background material

high

	<input checked="" type="checkbox"/>				
--	-------------------------------------	--	--	--	--

 low

4 Overall, the quality of discussions and dialogue for this event

high

		<input checked="" type="checkbox"/>			
--	--	-------------------------------------	--	--	--

 low

5 The opportunities for participants to interact (have questions answered, share concerns and experiences, etc) during the event

ideal

<input checked="" type="checkbox"/>

 too many

<input type="checkbox"/>

 too few

<input type="checkbox"/>

6 The time devoted to presentations by participants

ideal

<input type="checkbox"/>

 too much

<input checked="" type="checkbox"/>

 too little

<input type="checkbox"/>

7 Overall, my satisfaction with the administration of the event

high

<input checked="" type="checkbox"/>					
-------------------------------------	--	--	--	--	--

 low

8 The quality of pre-event administration was

high

				<input checked="" type="checkbox"/>	
--	--	--	--	-------------------------------------	--

 low

9 Receipt of event information in sufficient time before the event

yes

<input type="checkbox"/>

 no

<input type="checkbox"/>

10 The quality of the administration (staff responsiveness, etc) at the event

high

	<input checked="" type="checkbox"/>

CSI - SEMINAR REPORT

A one-day technical seminar on higher studies was presented by MR. Hariharan from amazon limited had given a seminar on THE CURRENT TRENDS IN INDUSTRIES, an eye opening session. He spoke about the evolving technologies and the current trends on the stream of computer science. And gave us ideas of how easily to crack the examinations like aptitude, technical questions, the means to clear the examination with the higher percentile of mark and helped us in understanding basic notion of how to analyse the concepts of programming in the preliminary levels. He suggested some of the top companies and their recruitments in the various fields.

He spoke about the different methodologies in which a person can solve a problem and spoke about the ideas of improving the programming skills. And gave us an idea about the upcoming technologies and their evolution in the current scenario. It was very easy for us to understand the importance of the current trends. This session was a stepping stone to understand the concept and the importance of the current trends in the industries. As we are the pre-finalizers', this session gave us an argue to know more about the importance of the current technologies used in the industries. He spoke about the current upgraded trends in the industrial and spoke about on what the means recruitments take place. He gave us an idea of how to solve the logical questions with the use of tricks. He thereby concluded by adding the programming skills needed to improvise and to understand the knowledge of programming.

Date : 2/2/19

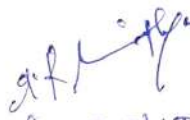

Total no. of Students Attended :

Theme : TECHNICAL TRENDS IN INDUSTRY

Resource Person : MR. R. HARIHARAN

Summary of the Session : One of the biggest trends to emerge in recent years is the Internet of Things (IOT). He explained how the perfect match has to be made between physical and digital world.

Feedback from the Students : Really, the session made us to think out of the box, it was really informative. We explored many new techniques and trends in IT.

Date : 18/01/2019

Total no. of Students Attended : 180

SESSION DETAIL

Time : 2.30 - 4.30 pm.

Topic : Supply Chain Management

Resource Person : Dr. Suresh Nanda Kumar

Summary of the Session: The session highlighted the use of supply chain using IoT and block chain in Industry 4.0. It showed the importance of the topic and the development of industrial revolution.

Feedback from the Students: The session was very useful and made us ~~very~~ realize its importance in the industrial world. It also showed us the recent development of the various concepts.

EVALUATION AND FEEDBACK FORM

Name : RESHMIA . R . R .

Branch : CSE III Year

Event : Supply chain Management

Date : 18/1/19

Phone : 8220515078 Email : rrreshmia0111@gmail.com

PLEASE CIRCLE THE APPROPRIATE NUMBER

(5=EXCELLENT AND 1=POOR)

1. How valuable were the ideas, concepts, and program content?

1 2 3 4 5 ✓

2. How effective was the instructor's presentation of the material?

1 2 3 4 ✓ 5

3. How would you rate the program overall?

1 2 3 4 ✓ 5

4. What are the chances that you will implement a few ideas we discussed?

1 2 3 ✓ 4 5

5. Please comment on how this seminar was helpful to you:

This gave us an idea about supply chain Management and the future benefits of the chain Management

6. What specific things might be done to improve this seminar in the future?

The way to present it is a interactive way to honestly speak about a topic. Industrial too was very much useful for us.

ISTE SEMINAR REPORT – SUPPLY CHAIN MANAGEMENT

Dr. Suresh Nanda Kumar formerly from CII Institute of Logistics had given a seminar on Supply Chain Management on 18/1/2019. The session was very useful and made the students to realize the supply chain management's importance in the industrial world. The session highlighted the uses of supply chain using IoT and block chain in Industry 4.0. The showed the development of industrial revolution.

Supply chain management (SCM) is the broad range of activities required to plan, control and execute a product's flow, from acquiring raw materials and production through distribution to the final customer, in the most streamlined and cost-effective way possible.

V. Sridhar

J. Suresh

PRINCIPAL
MEENAKSHI SUNDARARAJAN ENGINEERING COL
363, ARCOT ROAD, KODAMBAKKAM
- CHENNAI-600 026

SCM encompasses the integrated planning and execution of processes required to optimize the flow of materials, information and financial capital in the areas that broadly include demand planning, sourcing, production, inventory management and storage, transportation -- or logistics -- and return for excess or defective products. Both business strategy and specialized software are used in these endeavours to create a competitive advantage.

It was very helpful and a guiding stone to understand the concept and the importance of supply chain.

Talk by: Mr. C.S.Venkat Raman, CEO & Director,
Prestolite Electric India Pvt. Ltd.

Ethics are a foundation of a good company, and while they can be fixed, the best companies begin with a solid ethical footing. On the 22nd of September, 2017 the students were addressed by Mr. C.S. Venkat Raman, CEO and Director of Prestolite Electric India Pvt. Ltd. He focused on the essence of entrepreneurial ethics that is required to build entrepreneurs, whose activities grow wealth in any society. He also added that entrepreneurial ethics are sound business principles to be employed by entrepreneurs to be successful. He spoke about the ethics that should be followed such as to respect self and people around us, to honor strong performers, to focus on customers, to be result oriented and so on. The speech highlighted the important points on Business ethics which the students found very beneficial and gave an idea of how to form an organization's ethics.

Dear Sir,

Greetings.

We are extremely happy to invite you for a guest lecture on 25th January 2019 at 2.30 PM on the topic "Towards Measuring Quality of Service in Untrusted Multi-Vendor Service Function Chains: Balancing Security and Resource Consumption".

It would be certainly useful to our students.

Thanking you,

--

Regards,

B.Monica Jenefer

Dear Ma'am,

I have a laptop that only has an HDMI port. Hopefully, the projector has support for this. Otherwise, I will try to bring a converter or a different laptop.

CSI - GUEST LECTURE REPORT

A guest lecture was organized by the CSE department, on 25th January, 2019, in the department lab. The speaker was Mr. Prasanna Karthik Vairam, Research Scholar in the RISE Lab of Department of Computer Science and Engineering at Indian Institute of Technology Madras. He previously worked at Intel, Bangalore during the period 2011 to 2014 where he was involved in the development of a Functional Model of Intel's Graphics processors. He addressed the II year, III year and IV year students on the various facets involved in presenting and publishing a paper in reputed journals.

The session started off with Mr.Prasanna sharing the path he took, pursuing a Bachelor's degree in Computer Science at Meenakshi Sundararajan Engineering College and Master's degree in Computer Science at Indian Institute of Technology, Bombay. In this manner, he educated students about the real life requirements and challenges faced in pursuit of higher studies. He clearly differentiated the pros of pursuing a master's degree in India and of pursuing a master's degree, abroad.

This was followed by a small lecture on one of his recent publication "Towards Measuring Quality of Service in Untrusted Multi-Vendor Service Function Chains: Balancing Security and Resource Consumption" in IEEE International Conference on Computer Communications, INFOCOM, 2019. He educated the students about requirements and expectations of reputed journals such as IEEE. He taught the students how to publish a professional paper. What to include and what not to include in such Journal/Conference papers. He shed light on the right way of approaching while coming up with new ideas.

This was then followed by a lengthy Q&A session with the students. This helped the students clear many, with information regarding degree selection, project selection, hot research domains, internships and letters of recommendation and so on. Some students were also given targeted advice on how to prepare a Journal/Conference paper. Nuances of the exams and requirements both in India and abroad were also covered. He also promised to offer Research Intern opportunities for 6 students among the department.

 HOD / CSE

All in all, it proved to be a highly informative and interactive session, students got clarity about pursuing master's degree in India and publishing papers. We would like to thank the management, department and staff for providing us with this opportunity to have a hands-on interactive experience, that we may make informed decisions in pursuit of our respective careers after the completion of our baccalaureate degrees.

CSI SEMINAR SUMMARY

Class : II, III, IV
 Date : 25.1.2019
 Total no. of Students Attended : 101
 Theme : Research opportunities / Towards Measuring Quality of Service in untrusted Multi-Vendor Service Function Chains; Balancing Security & Resource Consumption
 Resource Person : Mr. V. Prasanna Karthik
 Summary of the Session : Research intern opportunities were discussed. The perks of doing MS in India were elucidated. Pervasive problems in networking were addressed. Overall, it proved to be a highly informative session for the students.

Feedback from the Students :

RASHMIKA CALVE

It was a very informative session. It helped us gain a better understanding on Quality of Service. *Rashmikalve*

ARJUN NAG ASHOKKUMAR

The session was a lot of fun, It gave us a very accessible understanding. The lessons we learnt are bound to make an impact on our future decisions.

SANJANA P:

The session gave us an insight on the tree data structure, an avenue to explore. The instructor also gave his experience of higher studies which was enlightening. *Sanjana*

Respected Sir/Madam,

Date : 18th January 2019

Event : One day Technical Seminar

Venue : Meenakshi Sundararajan Engineering College, Kodambakkam

Department: Computer Science And Engineering

The department of computer science and engineering of Meenakshi Sundararajan Engineering College is planning to conduct one day technical seminar on recent technical domain preferably like ARTIFICIAL INTELLIGENCE and DISTRIBUTED SYSTEMS. This seminar is conducted annually by the department with the motive to help students face the demanding placement environment. Hence we request your esteemed company to conduct this seminar on the domains in which students are expected to have appreciable knowledge on the day of JAN 18, 2019.

Thanking You.

Yours tr

CSI –TECHNICAL SEMINAR REPORT

VIGYAN is a one-day technical seminar which is conducted every year in the Computer Science and Engineering department. Vigyan 2019 took place on 18-01-2019. The day started off by invoking the blessings of the Almighty, followed by a warm welcome to the guest speakers. Two sessions were planned each dealing with a topic that is relevant to the current technological domains.

SESSION 1:

The first session was on Cloud Computing. Mr. Faizan Ahmad and Mr. Abilash Padmanabhan from Sirius Computer Solutions, were at the helm. The procedure of deploying a website was explained in detail, right from the very basics. Then an introduction to cloud computing was given. Later, the technicalities of the topic were discussed.

The pitfalls of the existing systems were analysed which led to how cloud computing came into existence. The various types of cloud services were discussed along with the cloud service providers. A practical demo of how to host websites using amazon web service was provided. The deployment of static and dynamic web pages was shown.

HOD / CSE

The session was extremely interesting, interactive and the topic was brilliantly chosen, as cloud computing is the need of the hour.

SESSION 2:

The second session commenced after a break for lunch. Dr. Suresh Nandakumar, Former Counsellor, Education CII-Institute of Logistics, was the speaker for this session.

The theme was Supply Chain Management. A sketch of the process of product manufacturing was given and the key points to be noted were emphasised. The role of computer science in industries was clearly elucidated by discussing the involvement of various technologies like Internet of Things, Cloud Computing, Blockchain etc. Several facts and figures were discussed and interesting new points were observed. The session

HOD / CSE

also served as a wonderful refresher to various database, big data and networking topics. The presentation was then concluded with a brief outlook in Industry 4.0. On the whole, it was an invigorating and content rich session.

Both sessions provided several new perspectives to existing technologies as well as scope for growth of such technologies in future. It was truly an enlightening and enriching even. Finally, with the delivery of the vote of thanks, Vigyan '19 came to a wonderful end.

CSI SEMINAR SUMMARY

Class : II, III, IV YEAR
Date : 18-01-2019
Total no. of Students Attended : 190
Theme : SUPPLY CHAIN MANAGEMENT
Resource Person : DR. SURESH NANDAKUMAR
Summary of the Session :

The session started with the basics of Supply Chain Management. Later, various technologies involved in SCM, such as Cloud computing, IOT, Blockchain were described.

Feedback from the Students :

This session brushed up the basic terminologies from subjects like CN, DBMS. We were introduced to many new terminologies. He was clear on every word he spoke.
P. Divyalakshmi

This seminar provided a basic information on many technologies like Cloud computing, DBMS etc. The first session was mainly about cloud computing, cloud services, AWS etc. The second session focussed on supply chain management, bigdata, IOT, data transformation etc. This was quite informative and effective.
M. Meera

The session was extremely informative and touched on trending topics.
S. AARTHI

CSI SEMINAR SUMMARY

Class : II, III, IV year
Date : 18-01-2019
Total no. of Students Attended : 190
Theme : CLOUD COMPUTING
Resource Person : Mr. FAIZAN AHMED
Summary of the Session :

The session started with the basis of deployment of a website and various concepts of cloud computing were covered. It ended with a practical demo of website deployment using AWS.

Feedback from the Students : The session was very interactive and we could know more about cloud computing, its advantage, and Application. - Rab

session was really informative. We've got some knowledge regarding cloud computing. - N. S. ...

The session was well conducted & highly invigorating, regarding the nuances of AWS approach to cloud computing. - Ajay

5. Please comment on how this seminar was helpful to you:

Cloud Computing is a very important concept used in the industry. It was delivered effectively and the provided foundation was strong.

6. What specific things might be done to improve this seminar in the future?

Hands-on training can be given.

7. Other comments:

Longer session with hands on training would have been better.

YRC ACTIVITY (2018- 2019)

Yoga Training Programme 23th January of 2019

The yoga training programme was conducted on 23th January of 2019, organised as part of the 10th Hindu Spiritual Fair, at AM Jain College at Meenambakkam thousands of students of both school and college were a part of it. The boys of NSS and YRC of Meenakshi sundararajan engineering college were also an active member of this great event.

The main motto of this event was to create an awareness of benefit and the golden values of yoga. The organiser along with the spectators performed various asana's that would enhance the students both spirituality and physically. The organiser said Yoga is an invaluable gift of India's ancient tradition. It embodies unity of mind and body; thought and action; restraint and fulfilment; harmony between man and nature; a holistic approach to health and well-being. It is not about exercise but to discover the sense of oneness with yourself, the world and the nature. By changing our lifestyle and creating consciousness, it can help in wellbeing."

The active participation of our college students with full involvement and discipline maintained by the students through this event made this into a successful one.

This knowledge of yoga attained by our students didn't stop at once since it was thought to the young students of the college .The spark of fire which was started during the yoga will be carried throughout their life since it was a valuable gift for the student

ISTE SEMINAR SUMMARY

Date : 2/2/2019

Total no. of Students Attended : 117

SESSION DETAIL

Time : 2.30 - 4.30

Topic : CAREER GUIDENCE

Resource Person : Mr. R. HARIHARAN

Summary of the Session:

The session conducted by Mr. Hariharan was a technical one, where he discussed about various ways how companies recruit students and also gave the students some guidelines to prepare for the campus interviews. He also made us to work out some aptitude problems which had occurred during placements. The students and the session conductor had a good interaction about the current technologies being evolved in India.

Feedback from the Students:

- ① The students had a good time interacting with Mr. Hariharan as he made the session a lively one, by solving aptitude related problems, discussing various technologies being updated in India.
- ② This session provided a good guidance about how to prepare for an interview, what type of course could be taken for masters, and how to make oneself updated with the latest tech knowledge and implement them in various ways, so that one can reach greater heights.

ISTE SEMINAR REPORT – CAREER GUIDANCE

Mr. Hariharan from amazon.com had given a seminar on CAREER GUIDANCE, an opening session on career guidance on 2/2/2019. He spoke about the evolving technologies and the current trends on the stream of computer science. He gave the idea on the basic notion of understanding of how to analyse the concepts of programming. He gave an in-depth knowledge about the top company's interview processes.

He gave an idea of how to improve the programming skills. And explained about the upcoming technologies and their evolution in the current scenario. It was very easy for the students to understand the importance of the current trends. It was very helpful and a guiding

V. Smdni

stone to understand the concept and the importance of perfect career. The session was really a stepping stone to achieve greater heights.

He thereby concluded by adding the programming skills needed to improvise and to understand the knowledge of programming. He spoke about the current upgraded trends in the industrial and spoke about on what the means recruitments take place.

MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE

PLACEMENT SKILL TRAINING

Topic: Placement interview guidance

Inaugurated on 11th February 2019

Chief Guest: S.Sri

G.Ramya (Accenture).

One of the key objectives of the placement training program is to provide training for students to improve their employability. The session is held on 11th February 2019 and the chief guest for this event are S.Sri and G.Ramya .The entire session was energetic and our students learn a lot of technical stuff. Students are made to realise their positives and focus on areas in which they are best at so that it increases their self-esteem and they learn to portray. In order to keep the hope high, it is very important to boost motivational skills. These experience personnel taught about their company's recruitment process and how to cultivate teamwork, practical skills, self-confidence and self-esteem.

ISTE SEMINAR REPORT – HIGHER STUDIES

Mr. N. Nanda Kumar from Think and Learn Pvt. Ltd. had given a seminar on HIGHER STUDIES, an opening session on higher studies on 7/3/2019. He spoke about the evolving technologies and the current trends on the stream of computer science. And gave them ideas of how easily to crack the examinations like GRE, TOEFL, ITSELS ETC. He gave an in-depth knowledge about the top universities of the world.

It was very fun way of learning and completely interesting session. The students got to know about various masters programs available. It was very easy for the students to understand the importance of the current trends.

CAREER GUIDANCE PROGRAM

Topic: Placement and higher studies

Inaugurated on 26th August 2018

Chief Guest: Mr. Sanjay Radhakrishnan

Senior Director

Cognizant Application Services

The main aim of career guidance program on placement and higher studies is to create awareness among the students about the placement and higher studies opportunities. The session is held on 26th August 2018 and the chief guest for this event is Mr. Sanjay Radhakrishnan. The entire session was interactive and our students got idea about various universities for their master's degree. Students also understood the basic skill set needed to crack the interview.

CSI SEMINAR SUMMARY

IV Year / VI Semester

(2015-2019 Batch)

A workshop was organized by the CSE department, on 6th and 7th July 2018, in the department lab. The trainer, Mr.Suresh Chandran is the Managing Director of Cloud Career Solutions and Mr.Arun Prakash is a Test Engineer in the same company.They have experience of over 9 years in the software testing field.On the first day,all the theoretical concepts of Google Web Driver,Selenium,Java was dileneated.While on the second day these concepts were brought into action with the help of codes.

R. Venkatesh
(R-VENKATESH)

Principal
MEENAKSHI SUNDARARAJAN ENGINEERING COL
363, ARCOT ROAD, SODAMBALIGUDEM
CHENNAI-600 026

The first day of workshop started with a brainstorming session where the students came forward to develop a simple dynamic website. An elaborative introduction to various automated testing tools, used to test a newly developed software was given. Various types of automated testing tools available, was delineated. The concepts of Manual Testing was elucidated to work on that concept. And types of Black Box, White Box, Grey Box testing was explained. The important concepts of Java was brushed up. Various versions and its usage was discussed. Selenium, a portable software-testing framework for web applications was installed. It provides a playback tool for authoring tests without the need to learn a test scripting language. Basic coding to work with Selenium was taught and various necessary jar files and packages were installed. Team activities were conducted. The task assigned to each team was to identify the requirements of a product specified. Time was given to work with the team and later on discussion was done. The best team was selected and appreciated. The first day ended with question and answer session. The students raised so many doubts on the concepts of Selenium, the queries were answered patiently.

CHENNAI-600 026

The second day of the workshop was practical. Initially Eclipse was installed and automated testing of the website GMAIL was done using Selenium. The username and password of Gmail account was mentioned in code to test the website. A mail was composed automatically with the desired message and was sent to the desired user. Later on various functions like Drag and Drop, Uploading a file in a website and taking screenshots of webpages of a website was done. Test websites was used to perform these actions. The code to perform these actions

were elucidated in detail. Few java codes were formulated by the students. In the end of the day, the students learned to perform various test cases on a website, automatically, with the available tools.

CHENNAI-600 026

On the whole it was an informative workshop. Though the concept of testing was new to the students, it excited them. Various doubts were raised in the students' minds regarding testing and they were addressed by the trainers. In the end of the day, the role of a Software Developer and Software Tester was discussed. The scope of Software Testing was analysed. All in all it was an effective workshop. We would like to thank the management, department and staff for providing us with this opportunity to have a hands-on experience on Software Testing.

CSI SEMINAR SUMMARY

Class : CSE-IVth 1222
 Date : 26-07-2018 & 27-07-2018
 Total no. of Students Attended : 64
 Theme : Workshop - Automated Testing Tools
 Resource Person : -SURESH CHANDRAN-
 Summary of the Session :

The students were exposed to a Software testing tool. The session was very informative and useful to the students for the project testing process.

Feedback from the Students :

R. Prasanna

have an idea about software testing tools and the complications associated with it. learnt to take a simple stepwise toward the errors.

V. NITHYASHI

learning about selenium for jira usage was very new to us. It was an informative session. we learn new concepts in Java.

CSI SEMINAR SUMMARY

Class : CSE IV YEAR
Date : 06/07, 07/07
Total no. of Students Attended : 64
Theme : WORKSHOP - AUTOMATED TESTING TOOLS
Resource Person :
Summary of the Session :

Feedback from the Students :

1. RAJASIRI.J - was an informative session, we got to know more about java and the tools that are associated for testing.

2. N. Sharmila:

learnt web development along with tools like selenium worked in eclipse to do new projects, it was like a company, real time project.

EVALUATION AND FEEDBACK FORM

Name: M. NIKITHA

Branch: B.E CSE

Event: WORKSHOP ON TESTING TOOLS

Date: 07/07/18

Phone: _____ Email: nikithamanjunath43@gmail.com

PLEASE CIRCLE THE APPROPRIATE NUMBER

(5=EXCELLENT AND 1=POOR)

1. How valuable were the ideas, concepts, and program content?
1 2 3 4 5

2. How effective was the instructor's presentation of the material?
1 2 3 4 5

3. How would you rate the program overall?
1 2 3 4 5

4. What are the chances that you will implement a few ideas we discussed?
1 2 3 4 5

5. Please comment on how this seminar was helpful to you:

The session was conducted on the topic TESTING TOOLS which is completely new and interesting to us. We got to learn how testing is done by the testers and various types which was fascinating.

6. What specific things might be done to improve this seminar in the future?

The voice of the person who was taking the session was not audible. The internet connection was poor, and so we found it difficult to download the software which was required in this session.

get to know the data science concepts, a quick guide to the basics of the fundamental library for scientific computing in python NUMPY and python data analysis library PANDAS was provided. The PANDAS library is one of the most preferred tools for data scientists to do data manipulation and analysis and it is built over NUMPY. Hence, students were directed to work with NUMPY which is an abbreviation for NUMERICAL PYTHON deployed in the platform ANACONDA. Students learned how to store the data in a multidimensional array and how to slice the desired part data from the large datasets. Along with it, the panda library was imported with which data frames were created. A large data set was given in which using the library functions along with the LINE REGRESSION algorithm the conclusion was drawn. Using the basic algorithms and the library functions, how the machine is trained by the data provided by creating a model was taught. The model which students were taught to build was something that understands the relation between 'x' and 'y' values. The model which understands the relational data and delivers the conclusion through graphs is called PROFESSOR. Students were taught through working on various examples provided about

Workshop on Python and Machine Learning
CSI SEMINAR SUMMARY

III Year / V Semester

Batch :2016 – 2020

A two day workshop on **Python and Machine Learning** was conducted for the students of III year Computer Science and engineering on 13/8/2018 and 14/8/2018 by **Shiva.S of Rel.earnPro** in association with the Computer Society of India. The first day started with an introduction to machine learning followed by the brief explanation of different categories in machine learning viz. Supervised Learning, Unsupervised Learning And Regression Learning. After a brief discussion of theory, an introduction to an important interpreted programming language, Python was given, which is one of the significant and mandatory programming languages used in the domains of Data Science and Machine Learning. A hands-on approach to learn python was followed by the introduction . The appropriate working platform was installed and the basic concepts were taught practically. Students were encouraged to write their own programs and have a strong understanding on the fundamental programming concepts which is crucial for machine learning. It was an

CSI SEMINAR SUMMARY

Class

III

Date

13/8/18 & 14/8/18

Total no. of Students Attended :

62

Theme

: MACHINE LEARNING

Resource Person

: M. Siva

Summary of the Session

The machine learning seminar was fantabulous. It clearly explained the fundamental concepts of python. The most basic algorithms involved were taught. There was a brief explanation on data frames.

255

The applications and the logic was also detailed.

Feedback from the Students :

1. The concepts taught in the session was exceptionally good. Each and every module was brilliantly taught.
2. The machine learning concepts which involves basics of python programming language was also explained well. Could have been a little more interactive session.
3. The Basics of python was taught very well. Thank you for teachings us new concepts clearly.
4. The concepts and algorithms which he was discussed were clear to us. This session helped us to see the insights of machine learning algorithms & artificial intelligence.
5. The python basics ~~was~~ taught from basics.

CSI - WORKSHOP REPORT

A workshop on 'Ethical Hacking' was organized by the CSE department, on 15th February, 2019, in the seminar hall. The speaker, Ms. Aljaffrin was the Managing Director of AJ Infosec, Chennai. She gave a brief description on cyber crime and ethical hacking. The job opportunities for a ethical hacker, software tester, security engineer were discussed.

The motive of this workshop was to demonstrate students few hacking methodologies and ways to identify those threats. Some pervasive internet attacks such as the backdoor attack, SQL injection attack, cross browser scripting, phishing, Daisy chain, etc were demonstrated to the students. The basic phases of ethical hacking such as the footprinting, information gathering, scanning, enumeration, system hacking, escalation of privileges, clearance of tracks, etc were elaborated.

(S. AARTHI)

PRINCIPAL
MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE
363, ARCOT ROAD, KODAMBAKKAL
CHENNAI-600 026

HOD / CSE

The workshop started off with elucidating about the types of hackers such as the black hat hacker, white hat hacker, grey hat hacker, green hat hacker, blue hat hacker, red hat hacker, etc. The role of each hacker and the various ways to prevent them from data theft, data loss were discussed. Later on, she engaged in hacking the local system through webcam without the user's knowledge. Few apps such as the shadow, tracexot, etc available in the app store and play store for hacking purpose were installed in her mobile phone and their usage were demonstrated to the students. Also, the weakness and possibility of hacking one of the famous security mobile applications, the 'Applock' was demonstrated.

CHENNAI-600 026

The second half of the workshop concentrated on demonstration of various types of malwares such as the trojan horse, virus, spyware, worm. The role of a security engineer and its scope was discussed. She elucidated the students about 'bug bounty' followed by a deep discussion on the 'wanna cry' attack that happened in the recent times. This session was then followed by a intense question and answer session. She patiently answered all the questions posted by the students. The speaker gave her opinions on various queries.

Handwritten signature
G. AARTHA D

Handwritten mark

The last session helped the students understand the importance of security over the internet. Few ways to be cautious to attacks such as by installing a good anti virus software, monitoring the network periodically, etc were discussed. The students were educated about courses on ethical hacking and cloud security. Few courses available at the AJ Infosec, its scope, cost, duration were elucidated.

All in all, it proved to be a highly informative and interactive workshop, the students got a clear idea of what ethical hacking is and how to protect their own systems. We would like to thank the management, department and staff for providing us with this opportunity to have a hands-on interactive experience, that we may make informed decisions in pursuit of our respective careers after the completion of our baccalaureate degrees.

CSI SEMINAR SUMMARY

Class : II, III, IV
Date : 15/02/2019
Total no. of Students Attended : 160
Theme : ETHICAL HACKING
Resource Person : J. Aljaffein Banu
Summary of the Session :

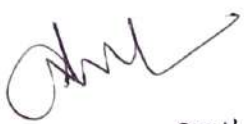

The session commenced with the basic techniques used in Ethical Hacking. A brief knowledge in the domains of SQL injection, malware, BlackHat was clearly rendered. The practical applications that involve these technologies was also explained.

Feedback from the Students

Starting from the overview of Ethical hacking we were introduced to Basic phases of ethical Hacking, various types of Hackers & characteristics and terminologies.

It was a very practical session and we enjoyed it a lot.

CSI SEMINAR SUMMARY

II Year / III Semestr(2017 – 2021)

III Year / V Semester(2016 – 2020)

IV Year / VII Semester (2015-2019)

SEMINAR REPORT

A seminar was organized by the CSE department, on 24th September, 2018, in the department lab. The speakers were from Munich Business School, Germany and NorthEastern University, United States. The speakers addressed the II year, III year and IV year students on the various facets involved in pursuing higher education in abroad. The university rankings, GRE, GMAT, TOEFL, IELTS scores for their universities were discussed. The session started off with one of the speakers elucidating the details of the Munich Business School. The courses available, the tuition fees, duration of the course, scholarships, job opportunities, VISA duration, rankings, etc were discussed. The expectations of the university from each candidate were elucidated in detail. Some ideas for building a sturdy profile were given to the students.

In this manner, some details such as the CGPA, GRE and TOEFL scores, country in which the student is planning to pursue, year of enrollment were collected. The details were analysed and each and every student was mentored. Few targeted advices were given to the students. The speakers clearly differentiated the pros of pursuing a master's degree immediately after completing Under Graduation and pursuing a master's degree after gaining some work

experience. This was followed by an interactive session where the students got an opportunity to explore career opportunities after a Master's Degree in Germany or USA.

This was then followed by a lengthy Q&A session with the students. This helped clear many doubts that the students had, with information regarding degree selection, project selection, hot research domains, internships and letters of recommendation and so on.

Some students were also given targeted advice on how to prepare for interviews during the admission process. Nuances of the exams and requirements both in India and abroad were also covered. All in all, it proved to be a highly informative and interactive session, students got clarity about pursuing master's degree in abroad and working in core companies. We would like to thank the management, department and staff for providing us with this opportunity to have a hands-on interactive experience, that we may make informed decisions in pursuit of our respective careers after the completion of our baccalaureate degrees.

CSI SEMINAR SUMMARY

Batch :2016 – 2020 & 2017 – 2021

A guest lecture on Career development was conducted for the students of II and III year Computer Science and engineering on 11/8/2018 by Vignesh.C of Mazenet in association with the Computer Society of India and Achieve Excellence Program. This session gave an idea about the wide platforms in the domain of computer science. This helped the students to know about the available careers, training and educational needs. It was an eye opening session that it overcame many doubts of the students. The Career Development program also helped the students to set realistic expectations of career growth by suggesting time frames for certain milestones. They had also aided the students in identifying the areas that they need to develop before becoming eligible for the next career milestone.

Apart from the programming perspective, the ever trending fields in the technology were well-focussed. Topics like Ethical Hacking, Cloud Computing, Big Data Analysis and Management, Web Server Expertise and Linux Server Operations that comes under the hardware category of computer engineering were well explained.

The current status and the new upgradations were well discussed which gave the students some new notions. The certification courses were explained in detail. The recent trend, the most used and developing certifications like ISTOB, CEF (Certified Ethical Hacking), LINUX Certification were described. Certifications like .NET, ASP, VB.NET, MICROSOFT.NET certification were emphasised. The PHP certification along with its

benefits and the future upcoming certification were precisely explained. Professional courses other than programming which have high future benefits like networking were also emphasized.

Career development by MAZENET was very inspirational and innovative that gave the students many ideas to choose a better career in future. It was very motivational and gave the students an insight about the future career planning. The students came to know about the blooming technologies and their hold in the IT sectors. This guest lecture by MAZENET gave the students a strong understanding about their career development process which will be beneficial for stepping the next milestone in career.

Class : III and II year CSE
Date : 11/9/2018
Total no. of Students Attended : 118
Theme : CAREER DEVELOPMENT
Resource Person : VIGNESH.C
Summary of the Session :

The seminar that was conducted today gave us a wide insight on

- * Big Data
- * Hardware and Networking
- * Redhat Linux
- * Hadoop
- * Software like V8.NET
- * Global virtualization
- * Job Role
- * Android
- * Java
- * Software testing

Feedback from the Students :

Student 1: Shikshya

I really had a very good experience in attending the seminar conducted by Muznet. It was a pretty informative and eye opening seminar from which I got a better insight about the current future technologies. The presentation was clear and the content was interesting. I am looking forward to many such seminars in the future.

Student 2: A. Sivarajani

Really invoted the ideas of application, software, hardware etc. It was very informative and it made clear about job roles and the entire view of IT field. Recent technologies are widely used technologies are covered and made us to know the importance. Expecting many seminars and informative ones from your team.

STUDENTS: A. Nisha Soudarya

This presentation was really useful. It gave us an idea about what we would do after graduation. The person who spoke was clear and the presentation as a whole was very informative and interesting.

ACADEMIC EVENTS REPORT 2018-19

TOPIC: WORKSHOP ON DATABASE MANAGEMENT SYSTEM:

DATE: 21.02.2019

IT Department of the Meenakshi Sundararajan Engineering College conducted one day workshop on Database Management System on 21-02-2019 in IT lab for Second year students. The workshop commenced with welcome speech and explained the objectives and importance of workshop

OBJECTIVES:

The objective of the workshop is to present an introduction to database management systems, with an emphasis on how to organize, maintain and retrieve - efficiently, and effectively - information from a DBMS.

RESOURCE PERSON:

Mr.Vasantha Kumar Kesavan started his career with HEWLETT PACKARD GLOBAL SOFT PVT LTD in 2008 as technology consultant since 2012. Currently he is working in Oracle India Pvt Ltd as senior member technical staff and expertise in oracle database, datawarehouse, infrastructure monitoring.

Outcomes:

Students should be able to:

1. Design ER-models to represent simple database application scenarios
2. Improve the database design by normalization.
3. Understand the concepts of Datamining and Datawarehousing.

Action Taken For: Content beyond Syllabus

CIRCULAR

Date: 28.2.2020

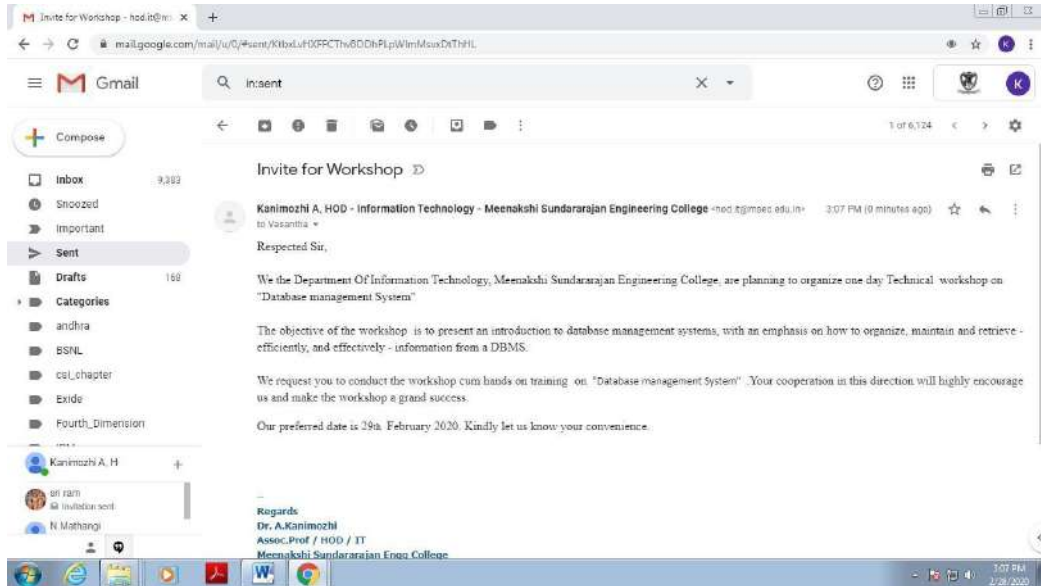

Now a day everything is getting advanced every second of time. Everyday starts with something new. Whatever be the field, everything is getting advanced. Lots of researches and studies are carried out various subjects around the world. These updates on various fields cannot be included in the student curriculum. The students have to always keep their eyes on what new things are arriving day by day.

One day Technical workshop on **Database Management System** is arranged for 2nd year students on 29/02/2020. All students must participate actively to meet challenges for the modern world.

Workshop Title: DATABASE MANAGEMENT SYSTEM
 Today's Date: 21/2/2019 Name of Presenter/s: MA. VASANTA KUMAR
 Association Name: INFORMATION TECHNOLOGY

For the following areas, please indicate your rating:

A. Content	1 Fair	2	3	4 Excellent
Covered useful material				✓
Practical to my needs and interests				✓
Well organized				✓
Presented at the right level				✓
Useful visual aids and hand-outs			✓	
B. Presentation				
Instructor's knowledge				✓
Instructor's presentation style				✓
Instructor responded well to questions				✓
Instructor facilitated interactions among participants well			✓	
C. How could this workshop be improved?	<i>Cover more information in lesser time.</i>			
D. Any other comments or suggestions?	- NO -			

E. Overall, how would you rate this workshop?
 POOR FAIR GOOD EXCELLENT

FEEDBACK BY STUDENTS:

MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE
DEPARTMENT OF INFORMATION TECHNOLOGY
Seminar / Guest Lecture / Workshop
Feedback Form

Event Name: GUEST LECTURE Date: 25/9/18
Name of participant: II YR - IT
Association Name: AIT Title: BIG DATA & CORE JAVA
Your feedback is important for planning future programming. Thank you.

4 = Excellent	3 = Very Good	2 = Good	1 = Fair	0 = No opinion
---------------	---------------	----------	----------	----------------

Circle your response

1. The seminar met my expectations.	4	3	2	1	0
2. The content was helpful.	4	3	2	1	0
3. The level of the seminar was appropriate.	4	3	2	1	0
4. The speaker had a good understanding of the topics.	4	3	2	1	0
5. The handouts were helpful.	4	3	2	1	0
6. I recommend that the seminar be repeated for other students.	4	3	2	1	0

Finally the resource person concluded with the sharing of own experience as a director of Technology and were given an opportunity to students to clear their queries about to the Core Java with Big Data.

MAIL CONVERSATION:

The Resource Person gave an clear explanation about block chain technology and started with his introduction. The clear explanation was given with real time examples as follows.

BLOCK CHAIN TECHNOLOGY:

Block chain is a shared, immutable ledger that facilitates the process of recording transactions and tracking assets in a business network. An asset can be tangible (a house, car, cash, and land) or intangible (intellectual property, patents, copyrights, branding).

Blockchain, sometimes referred to as Distributed Ledger Technology (DLT), makes the history of any digital asset unalterable and transparent through the use of decentralization and cryptographic hashing.

PRINCIPAL
MEENAKSHI SUNDARARAJAN ENGINEERING COL
363, ARCOT ROAD, SODAMBAKUNTA
CHENNAI-600 024

- A block chain is a database that stores encrypted blocks of data then chains them together to form a chronological single-source-of-truth for the data
- Digital assets are distributed instead of copied or transferred, creating an immutable record of an asset
- The asset is decentralized, allowing full real-time access and transparency to the public
- A transparent ledger of changes preserves integrity of the document, which creates trust in the asset.
- Block chain's inherent security measures and public ledger make it a prime technology for almost every single sector

PREFACE

ABOUT THE CONFERENCE

The objective of this national conference is to provide a platform for researchers, academicians, developers and students to share their knowledge and expertise for their mutual and social benefits. The focus of the conference will be on all the faces of current technological innovations and related issues in Information Technology.

ABOUT THE COLLEGE

Meenakshi Sundararajan Engineering College, Chennai constantly strives to be a center of Excellence with the singular aim of producing students of outstanding academic excellence and sterling character to benefit the society ,our nation and world at large. Fidelity, Faith, Fortitude are the high values that have made him propel to greater heights. The gem of his quality was that he never stopped with drawing plans and suggesting action - he was the first to bring them into practice, whatever may be the obstacle, he used to implement them.

ABOUT THE DEPARTMENT

The department constantly strives with the singular aim of producing students with outstanding academic excellence and sterling character to benefit the society, our nation and the world at large. The dedicated and committed staff, excellent infrastructure, well equipped computer labs with the latest hardware and software ensures that the students are molded with strong conceptual understanding in the core topics in Information Technology.

OUR VISION

To be a department that best serves industrial needs, employing technically savvy students who serve the nation at large.

OUR MISSION

1. To enrich and enhance the knowledge of its students with the latest developments.
2. To mould students with ethical and moral values.
3. To apply the concept of information technology within the institution through innovative applications.

MESSAGE FROM CORRESPONDENT DESK

“Burning enthusiasm multiplied with patience and perseverance, always brings success”

These were the strong beliefs of Professor K.R.SUNDARARAJAN, the founder of the Indian Institute of Engineering Technology [IET]. It is important that we understand the innovations in Technology in today’s fast moving world and I appreciate the Department of Information Technology for choosing “INNOVATIONS IN INFORMATION AND COMMUNICATION TECHNOLOGY” as their theme for the National Level Conference. I hope this National level Conference will be an eye opener to everyone on the current trends in Information Technology. I am proud that this event is the result of the hard work put by all the students and it’s also important to mention the support and encouragement provided by the department professors.

MESSAGE FROM SECRETARY'S DESK

“Wisdom is not a product of schooling but of the lifelong attempt to acquire it.”

Meenakshi Sundararajan engineering college has been a forerunner in recognising the needs of industry and integrating knowledge with professional inputs. Our college is one of the most eminent higher education institutions today and it is renowned for the standards of its facilities, students and alumni, by maintaining a team of core faculty members, who are constantly pushing the frontiers of knowledge. In today's high technology environment, organisations are becoming more and more dependent on their information systems. The development of communication has led to ponder over more ideas. The day to day innovations also serve as a huge threat. To bring over more ideas in the “RECENT DEVELOPMENTS” the Department of Information Technology have chosen the theme “Innovations in Information and communication technology” for their National level conference. I wholeheartedly wish them a grand success in their ventures.

MESSAGE FROM PRINCIPAL'S DESK

I feel jubilant in writing this message for the National level conference organised by the department of Information technology, Meenakshi Sundararajan Engineering College, Chennai. The theme chosen is “INNOVATIONS IN INFORMATION AND COMMUNICATION TECHNOLOGY”. The world today is “OF IT, BY IT, FOR IT“. This calls for a high security cover for Information technology applications. I am sure that this conference will be a step towards developing professional skills and keeping abreast of the advances in technology. Here I place my appreciations towards the dedicated faculty and sincere students for their effort in organising the event.

MESSAGE FROM DEAN ACADEMIC'S DESK

“A JOURNEY OF THE THOUSAND MILES BEGINS WITH ONE STEP” – Confucius

I feel extremely proud that the Department of Information Technology has striven hard in organising the National Level Conference 2019. It is indeed essential that we fathom out the ideas behind today's technological world. The theme “INNOVATIONS IN COMMUNICATION AND TECHNOLOGY” clearly emphasizes on the current trending topics in the field of technology. I truly believe this National Level Conference would make the participants updated with the innovations in technology. I appreciate the efforts taken by the teaching faculty of the department and their constant support for making this event a grand success. I WISH THE DEPARTMENT SUCCEES IN ALL THEIR ENDEAVOURS.

DR.K.UMARANI

MESSAGE FROM HOD'S DESK

It's indeed an immense pleasure that the creative and dynamic students of the Department of Information Technology have taken all the efforts to conduct the National Level Conference which is to be scheduled on 2nd March 2019. The theme that we have chosen is “INNOVATIONS IN INFORMATION AND COMMUNICATION TECHNOLOGY“ which clearly signifies the influence of technology in our day to day lives.. With this theme we wish to ignite the minds of people with innovative technologies. I also applaud the students and the staffs of the IT Department for bringing out this event as a magnum opus. I hope that “INNOVATIONS IN INFORMATION AND COMMUNICATION TECHNOLOGY” will serve as a guiding spirit for the forthcoming ventures by the students.

THE OBJECTIVE OF THIS NATIONAL CONFERENCE IS TO PROVIDE A PLATFORM FOR RESEARCHERS, ACADEMICIANS, DEVELOPERS AND STUDENTS TO SHARE THEIR KNOWLEDGE AND EXPERTISE FOR THEIR MUTUAL AND SOCIAL BENEFITS. THE FOCUS OF THE CONFERENCE WILL BE ON ALL THE FACES OF CURRENT TECHNOLOGICAL INNOVATION AND RELATED ISSUES IN INFORMATION TECHNOLOGY

CONFERENCE TOPICS

Topics of interest include, but are not limited to the following:

WEB MINING
SOCIAL NETWORKING
CLOUD AND GRID COMPUTING
MACHINE INTELLIGENCE AND SOFT COMPUTING
BIG DATA AND DATA ANALYTICS
IMAGE PROCESSING
WEB SECURITY
EMBEDDED SYSTEM
MOBILE COMPUTING
INFORMATION SECURITY
NETWORK SECURITY
INTERNET OF THINGS
PERVASIVE COMPUTING

ABOUT THE INSTITUTION

MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE, CHENNAI CONSTANTLY STRIVES TO BE A CENTER OF EXCELLENCE WITH THE SINGULAR AIM OF PRODUCING STUDENTS OF OUTSTANDING ACADEMIC EXCELLENCE AND STERLING CHARACTER TO BENEFIT THE SOCIETY, OUR NATION AND WORLD AT LARGE. FIDELITY, FAITH, FORTITUDE ARE THE HIGH VALUES THAT HAVE MADE HIM PROPEL TO GREATER HEIGHTS. THE GEM OF HIS QUALITY WAS THAT HE NEVER STOPPED WITH DRAWING PLANS AND SUGGESTING ACTION-HE WAS THE FIRST TO BRING THEM INTO PRACTICE. WHATEVER MAY BE THE OBSTACLE, HE USED TO IMPLEMENT THEM.

ABOUT THE FOUNDER

LATE PROF. K. SUNDARARAJAN, OUR BELOVED FOUNDER WAS A VISIONARY, AND EDUCATIONIST PAR EXCELLENCE AND A GREAT PHILANTHROPIST. BY HIS DEDICATED SERVICE HE HAD LIT THE LAMP OF KNOWLEDGE IN MANY STUDENT'S LIFE. HIS DEDICATION MAGNANIMITY ARE MOST ADMIRABLE AND PLACED HIM ON HIGH PEDESTAL IN LINE WITH THOSE WHO HAVE SACRIFICE FOR THE GROWTH OF OUR NATION.

OUR DEPARTMENT

THE DEPARTMENT CONSTANTLY STRIVES WITH THE SINGULAR AIM OF PRODUCING STUDENT'S WITH OUTSTANDING ACADEMIC EXCELLENCE AND STERLING CHARACTER TO BENEFIT THE SOCIETY, OUR NATION AND WORLD AT LARGE. THE DEDICATED AND COMMITTED STAFF, EXCELLENT INFRASTRUCTURE, WELL EQUIPPED COMPUTER LABS WITH THE LATEST HARDWARE AND SOFTWARE ENSURES THAT THE STUDENT'S ARE MOLDED WITH STRONG CONCEPTUAL UNDERSTANDING IN CORE TOPICS IN INFORMATION TECHNOLOGY.

OUR MISSION

1. TO ENRICH AND ENHANCE THE KNOWLEDGE OF ITS STUDENTS WITH THE LATEST DEVELOPMENTS.
2. TO MOULD STUDENTS WITH ETHICAL AND MORAL VALUES.
3. TO APPLY THE CONCEPT OF INFORMATION TECHNOLOGY WITHIN THE INSTITUTION THROUGH INNOVATIVE APPLICATIONS.

Respected Madam,

Sub: Permission to conduct National Conference – reg.

The Department of Civil Engineering is planning to conduct a National Conference on “Water Vulnerabilities in India’s River Basins and Management Strategies” on March 2nd 2019 (Saturday) in collaboration with Indian Concrete Institute. The main aim of the conference is provide platform to budding generation of researchers and young engineers. At this moment, on behalf of the department, we necessitate your permission to conduct the conference.

Thank You

Yours faithfully,

APPROVED BY AICTE AND AFFILIATED TO ANNA UNIVERSITY
National Level conference

Water Vulnerabilities in India's River Basins and Management Strategies
March 2nd 2019

About the Conference:

India is the largest user of groundwater in the whole world. About 230 billion cubic meter per year of ground water is extracted and used in India as against 105 BCM by USA.

A National level conference were conducted jointly by The ICI on 02nd March 2019 and the topic is “Water Vulnerabilities in India’s River Basins and Management Strategies” total number of beneficiaries are 206 (Batch: 2015- 2019 (IV Year) Batch: 2016 - 2020 (III Year) Batch: 2017 - 2021 (II Year) and 15 outside participants). The conference is headed towards exploring the recent inclination in water resource and management engineering with the key speakers concentrated on water quality, water pollution, climate change, rainfall, urbanization, floods and many different strategies.

The department of Civil Engineering was started in the academic year 2002 with an aim of promoting high quality education in the field of Civil Engineering. The academic activities of the department emphasis on deep understanding of fundamental principles, development of creative ability to handle the challenges of civil engineering and the analytical ability to solve the problems which are inter disciplinary in nature.

The department currently offers Bachelor of Engineering degree program in civil engineering and Masters in Construction Engineering and Management. WAFES is organized for students to explore the knowledge and interact with other college students. The Civil Engineering Association (CEA) is working effecting from the academic year 2002 to share the information and to help the society. Industrial visits are arranged for students to gain practical experience.

We have a separate block equipped with all facilities and labs. The department has a ICI (Indian Concrete Institute) students chapter and has a strong association with PWD, Highway Department, TWAD, SERC, CMRL, Chennai Port Trust, Metro Water, L&T, Utracon Structural Systems and Langdonseah. Civil department conducts various technical seminars, conferences, workshops and faculty development programme at regular intervals apart from academic curriculum to make both students and staff updated with latest research areas and trends in the civil engineering field.

ONE DAY TECHNICAL SEMINAR GIS AND ITS APPLICATIONS IN CIVIL ENGINEERING

RS and GIS of Earth Resources

Electromagnetic remote sensing of earth and its processing

Jan 19th 2019, saturday

Department of Civil Engineering
MEENAKSHI SUNDARARAJAN
ENGINEERING COLLEGE
363, Arcot Road, Kodambakkam,

Chennai 600024

Tamil Nadu

www.msec.edu.in

WHY THIS WORKSHOP ?

GIS is used more in the mechanical practice of construction industry. In construction during the preparatory phase, the issues of spatial positioning have to be solved cooperatively with the checking of the purposely and feasibility, the traffic projects are operated out and the alternative.

GIS technology is gaining interest from a wide range of civil engineering disciplines owing to its potential to offer a new way of resolving environmental difficulties which could reduce costs, support multi-discipline analysis and improve quality for complex projects. GIS software is inter-operable that allows many data designs used in the infrastructure development permitting civil engineers to give out data to many agencies in the required format while maintaining the data's core reliability.

GIS in civil engineering provides a dominant location to conduct longitudinal analysis overlay data and assimilate other solutions systems. Fabricated on a database and not in the individual project files, GIS allows civil engineers to effortlessly manage share, reuse and analyze data thus managing time and resources.

Presently a lot of thrust is given by the government to rehabilitate the existing structures to preserve and we keep it for our future generation. Certainly we hope this workshop fulfill this need and serve the correct technology to our society and also it will enhance our young and dynamic students.

To

The Secretary,
Meenakshi Sundararajan Engineering College,
Kodambakkam,
Chennai 600024

Respected Madam,

Sub: Permission to conduct seminar – reg.

The Department of Civil Engineering is planning to conduct one day seminar on the topic “Preventive measures of concrete in construction” at 28th February 2019. The main theme of this seminar is gaining the knowledge about corrosion and understands the effective measures taken for prevention. At this moment, on behalf of the department of civil engineering, we require your permission to conduct the seminar.

Thank You,

Yours faithfully,

Date: 20.11.2018

Place: Kodambakkam

To

The secretary
Meenakshi sundarrajan engineering college,
Kodambakkam
Chennai- 600024

Respected Madam,
Sub - Grant of permission for conducting Guest lecture in Civil dept

We have planned to conduct guest lecture in our department in the month of August on the topic **Fundamentals in Foundation Engineering** We also planned to invite the industrial experts in this regard to our college for lightening technical knowledge and hands-on experience to our students. At this moment, on behalf of the Civil Engineering, we require your permission to conduct the Guest lecture.

Hence kindly grant this permission to conduct guest lecture

Thank you

Regards

CIRCULAR

Date: 25.09.2018

It is proposed to conduct **Guest Lecture on 28/09/2018 for III year (CIVIL) Students.**

So, all the third year students are advised to attend the Guest Lecture.

1. Title : **“Fundamentals in Foundation Engineering”.**
2. Speaker : Dr.V.Balakumar
3. Date : 28/02/2019 (Friday)
4. Time : 10.30AM to 12.00 PM
5. Venue : Seminar Hall

Respected Madam,

Sub - Grant of permission for conducting Guest lecture in Civil dept

We have planned to conduct guest lecture in our department in the month of August on the topic **Pesticide Treatment in New Zealand**. We also planned to invite the industrial experts in this regard to our college for lightening technical knowledge and hands-on experience to our students. At this moment, on behalf of the Civil Engineering, we require your permission to conduct the Guest lecture.

Hence kindly grant this permission to conduct guest lecture

Thank you
