(Managed by I.I.E.T. Society, Affiliated to Anna University, Chennai,
Approved by AICTE. Accredited by NAAC with 'A' grade and NBA for programs applied)
363, Arcot Road, Kodambakkam, Chennai – 600 024, Tamil Nadu, India
Ph No: 044 – 24801636 Fax: 044 - 24811103

CRITERIA 6

6.2.3 Implementation of e-governance in areas of operation administration finance and accounts student admission and support examination

STAFF BIOMETRIC ATTENDANCE SYSTEM

The implementation of a Biometric Attendance System in our engineering college marks a significant step toward modernizing attendance tracking. This system utilizes unique biological identifiers, such as fingerprints, to accurately record staff attendance in real time. The Biometric Attendance System also integrates seamlessly with existing administrative software, enhancing overall operational efficiency. With enhanced security and user-friendly interfaces, this system not only streamlines attendance tracking but also fosters a culture of accountability among our staff.

AUTOLIB SOFTWARE FOR LIBRARY

The implementation of Autolib Library Software in our engineering college represents a transformative approach to managing library resources and enhancing user experience. Autolib is a comprehensive library management system designed to streamline various library functions, including cataloging, circulation, and user management. One of the key benefits of Autolib is its user-friendly interface, which allows students and faculty to easily search for and access a vast array of resources, including books, journals, and digital materials. The software supports advanced search options, enabling users to quickly locate items based on various criteria. Additionally, Autolib enhances the efficiency of library operations by automating routine tasks such as check-outs, returns, and inventory management. This automation not only reduces the workload for library staff but also minimizes errors, ensuring accurate record-keeping. The software also includes features for generating reports and analytics, allowing librarians to assess usage patterns and make informed decisions about resource allocation and acquisitions. By implementing Autolib, the engineering college aims to create a more efficient, accessible, and user-centric library environment, ultimately enriching the academic experience for all users.

STUDENT ADMISSION ENQUIRY SYSTEM

The Student Admission Enquiry System implemented through Google Forms in our engineering college provides a streamlined and efficient way for prospective students to seek information about admission processes, programs, and requirements. This online system is user-friendly, allowing candidates to submit their queries conveniently from anywhere at any time. With Google Forms, prospective students can easily fill out a structured form that captures essential details such as their name, contact information, and specific inquiries. This data is automatically collected in a centralized spreadsheet, facilitating quick access and organized management of enquiries. The system enhances communication between the college and prospective students, ensuring timely responses and personalized support. It also reduces administrative workload, as staff can efficiently track and respond to multiple inquiries without the need for manual logging. By utilizing Google Forms, the engineering college not only modernizes the admission enquiry process but also improves accessibility, ensuring that potential students receive the information they need to make informed decisions about their educational journey. Overall, this initiative reflects the college's commitment to leveraging technology for better student engagement.

STUDENTS AU PORTAL

The Anna University Student Portal System is an integrated online platform designed to enhance the academic experience for students. This user-friendly portal provides a centralized hub for accessing essential services and information, streamlining various administrative processes. Through the portal, students can easily view their academic records, including grades, attendance, and course schedules. It also facilitates the registration process for classes and exams, allowing students to manage their academic activities efficiently. Additionally, the portal serves as a communication channel between students, faculty and Anna University, enabling announcements, notifications, and important updates to be shared seamlessly.
